

Product Description

The S6867T control center is compatible with the following modules:
DS4 and DS4+.

Mounting the Control Center

Note Once this replacement control center has been installed, all remote controls must be paired with your system. See Remote Pairing for details and follow the instructions for your remote control type.

The control center's position should be discussed with the vehicle owner prior to installation since the antenna, with built-in status LED and Valet/Program, must be visible/accessible to the customer.

The best position to locate the control center is centered high on the front windshield. It can be mounted vertically or horizontally relative to the windshield. Metallic window tint can also affect range negatively, so this should be a consideration when determining the mounting location.

After you determine the best mounting location, follow these steps:

Clean the mounting area with a quality glass cleaner or alcohol to remove any dirt or residue.

Plug the cable into the control center.

Mount the control center with double-sided tape.

Route the cable down the window pillar to the control module and plug the cable in the control module.

Remote Pairing

Prepare the vehicle system to be Paired with a new remote

1. Open at least one vehicle door.
2. Turn the key to the ON position.
3. Within 5 seconds press and release the Control button on the Control Center one time.
4. Within 5 seconds, press and hold the Control button on the Control Center. The status LED begins flashing in single flash sequence and the siren/horn sounds once to confirm the system is ready for remote pairing. Release the button.
5. Locate your remote control model below and follow the instructions.

System Pairing will exit if:

- The ignition is turned off
- The open door is closed
- 60 seconds lapses with no actions

Note: Make sure the remote to be paired with the system is set for the desired Car 1 or Car 2 operation.

LCD Remote Control:

1. Press and hold the **f** button for 8 seconds, the remote beeps once, **Main Menu** is displayed. Release the **f** button.
2. Press the AUX or  buttons until **Pair** is displayed.
3. Press and hold the **f** button until the remote beeps 3 times then release the **f** button. The remote is now ready to pair with the system.
4. Press the  button.
5. Wait several seconds for feedback as the remote generates a security encryption and sends it to the Control Center. If pairing is successful the siren/horn sounds and the remote emits several tones. The screen displays if the Pairing is successful or failed with corresponding text. If pairing fails repeat step 4.

To exit pairing mode on the remote:

- Press and release the  button.
- Wait 30 seconds without pressing a command button on the remote.

Responder LED or Companion Remote Control:

1. Press and hold the **f** button for 8 seconds. The transmit LED will come on solid. Release the **f** button.
2. Press and hold the  until the transmit LED flashes 3 times then comes on solid.
3. Press the  button.
4. Wait several seconds for feedback as the remote generates a security encryption and sends it to the Control Center. If pairing is successful the siren/horn sounds and the 2-way remote emits several tones (the companion remote does not generate tones). If pairing is not successful press and release the **f** button once and then repeat steps 2 and 3.

To exit pairing mode on the remote:

- Press and release the **f** button once, then press and hold until the transmit LED shuts off.
- Wait 30 seconds without pressing a command button on the remote control.
