

Addendum A

This addendum is an attachment to be included within the manual of SR Telecom's Stride2400 Product

Equipment Operation:

Attention: Changes or modifications not expressly approved by SR Telecom or their designated compliance representative(s) could void the user's authority to operate this equipment.

Equipment Compliance:

Note: This equipment has been tested and found to comply with the limits for a class A digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the distance between the equipment being interfered with and this product
- Connect the equipment being interfered with into an outlet on a different circuit than the one which this product is connected.
- Consult the installation and/or manufacture for assistance.

Antenna Installation Distance:

This is a line of sight system; requiring the antenna to be installed at a minimum height of 25 feet. This installation height ensures proper operation of the system, while ensuring proper separation to the antenna. Due to the minimum height of 25 feet, the separation distance from the antenna to the user is greater than 30cm.
