Acknowledging Special Precautions and the FCC Industry Canada Notice Cautions

Modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC compliance Information

This device complies with part 15 of FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received.

Including interference that may cause undesired operation.

Information to User

This equipment has been tested and found to comply with the limits for a Class B digital device, Pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio Frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

1. Introduction

Bluetooth Headset ABH-204 can be carried as a wireless headset product based on Bluetooth technology.

What is Bluetooth Technology?

Bluetooth Technology allows the users to communicate data in the wireless network, which is the wireless network technology can be used in the short-range distance. It is designed to communicate data/voice within short-range distance of 10m to 100m.

Bluetooth Technology operates in 2.4GHz ISM(Industrial Scientific Medical) of RF bandwidth, which can be used in most countries without any government regulations. Low cost, low power consumption and Robust data communication are main feature of Bluetooth Technology and Bluetooth allows Home appliance, Handheld PC/PDA, LAN PSTN, Mobile Phone to connect to wireless network, such as internet service.

3. Headset Features

4. Preparation

a) Getting started

Before you start using the headset with a phone or other device for the first time, you should:

- Charge the headset battery by using a battery charger in the package..
- Pair the headset with a Bluetooth device, such as, a mobile phone.

b) Charging

The Bluetooth headset is packaged with a built-in rechargeable battery. The battery may not fully charged when you buy the headset. We recommend that you charge the battery until the headset indicator light switched off before using the headset for the first time.

To remind you that you will soon need to recharge the battery, the headset indicator light flashes red rapidly if the headset is on.

It usually takes 2.5 to 3.0 hours to fully recharge the headset battery.

During charging, the indicator shows a steady red light on the indicator light.

When the battery is fully charged, the red light turns off and no light on the indicator light.

How to charge the battery

c) Choose right or left ear for wearing the headset.

The ABH-204 Bluetooth headset comes configured for wearing on your right & left ear, please follow the instructions as provided :

1. Hold the headset firmly and put the earloop in its open position at your desired degrees for left or right year.
 2. Place the earloop behind your ears
 3. Remind you that the headset is positioned as indicated in the following picture.
- For using the earloop for left-ear & right-ear use, please see the picture as provided.

d) How to use Necklace holder

e) How to use Belt clip

5. How to use the Headset

Introduction in this user's guide are based on the headset buttons and phone keys.

a) To turn the headset on

Press and hold Talk Button for 5 seconds then the light turns to Green flashes five times, and you hear a short high tone followed by Green flashes.

b) To turn the headset off

Press and hold Talk Button for 5 seconds then the light turns to Red flashes five times, and you hear a short low tone followed by Red flashes.

c) Pairing the headset

Firstly, you should pair the headset with the device you want to use it with, such as a mobile phone, before you use your headset for the first time. The Bluetooth connection between the headset and a mobile phone can be established by setting up a paired link, Once you have paired your headset with the phone, you do not need to pair it again until you want to use it with another phone.

1. Prepare your phone according to the phone's user documentation on pairing.

2. Press Talk button for up to 5 seconds until you hear a short high tone twice and the indicator flashes green and red. Then the headset is ready for pairing.
3. For access range, please make you sure that the headset is within 5m(15 feet) ~ 10 m (30 feet) of the phone.
4. Please enter Headset passkey(“0000”) then it starts pairing procedure.
5. For the detail procedures of pairing, please refer to a mobile phone’s manual.

d) To reset the headset

1. With the headset turned on, press and hold Talk Button for up to 2 seconds and release the button. Then, the headset is turned off.
2. Press and hold Talk Button again until the red and green flashes, and the headset is now turned on. And then please refer to the procedure c) mentioned on the above.

e) Making calls

– Making calls from the mobile phone.

1. Place the headset on your ear in the desired wearing style.
2. Dial the phone number by using the phone’s keypad,
3. Press the phone’s SEND / Call key in order to send the calls – the phone initiates the call.
4. The call will be transferred automatically to the headset by pressing talk button, while the phone is ringing

– Ending a call from the headset

To end a call when wearing the headset, press the headset’s Talk Button while connected.

– Reject a call from the headset

To reject a call, press and hold the headset’s Talk Button until you hear a short beep.

f) Answering calls

1. When the headset rings, press the Talk Button.
2. End the call by pressing the Talk Button.

g) Transferring a call from phone to headset

By pressing Talk button, you can transfer sound /call to the headset if the headset is on, paired with phone.

(For transferring call from headset to phone, please refer to the user guide of a mobile phone)

h) Making calls using Voice Dialing

1. Place the headset in your ear in the desired wearing style.
2. On the headset – Press the talk button for more than 2 seconds. Then the voice dialing function is enabled in your headset.
3. You will hear the short tone which asking you to say the name of the person you wish to call (as entered in your phone's voicemail phonebook directory). Speak the voice 'tag' name.
4. The phone automatically dials your selection, and you will see the details of the call on the phone screen.
5. When connected you are free to communicate normally via the headset.
6. Press volume up or volume down key for dialing the last call.

(Note : Please refer to the phone user guide for instructions on storing voice tags)

- Ending a call from the headset

To end a call when wearing the headset, - press the headset's talk button for 2 seconds when the headset is ringing.

i) To answer a second call.

Please press talk button for answering a second call while you are on the phone.

j) Adjusting Mic. Volume & Mute

You can regulate the volume to the speaker in steps by adjusting Volume up + and volume down – button. One step per key press increases / decreases the desired volume. A short beep will be heard for each steps of +/-.

For mute function, please press and hold **volume up button** for 5 seconds until you hear short beep, and for unmuting, please do the same procedure as you have done for muting.

7. Trouble Shooting

It will guide you how to solve problems, which you might encounter while you are using the headset.

1. If you get no sound from headset,
The pairing procedure should be done between the headset and the mobile phone for recognizing each other.
And they also must be within range of each other, for the outdoor, it is up to 10m(30 feet), and we recommend to keep the mobile phone and headset in the same room, or within 5 m(15 feet) from each devices.
2. If you have no light on the indicator's LED during charging
When the battery is full charged, no light is shown on LED, then you are ready for pairing headset for a mobile phone. And no light is shown when the headset is switched off.
3. If you are uncomfortable with the headset around your ear.
Adjust the length of ear loop properly for your ear, it will make you feel comfortable for wearing.
4. The headset is automatically turned off.
Please check whether the battery is too low, the indicator light on the headset flashes red and you hear a low beep.

5. Please make your headset fully charged before you use the headset at the first time after purchasing.
6. If you are facing other problems, please contact your local distributors in your area.
