

April 18, 2005

Dear Valued Customer

It is my pleasure to announce that CalAmp Corp ([www.calamp.com](http://www.calamp.com)) of Oxnard, CA has purchased the assets of Skybility Inc. of Carlsbad, CA. CalAmp has been a leading provider of satellite and wireless communication solutions since 1981 and publicly traded on the NASDAQ (CAMP) since 1983.

The Skybility team will be integrated into the CalAmp Products Division as our M2M product line. By leveraging CalAmp's manufacturing capabilities and engineering expertise we will be able to provide greater resources and technical enhancements to the M2M product line. CalAmp has no current plans to re-locate the Technical or Sales activities out of the San Diego County area, however, finance and administrative activities will be transitioned to our headquarters in Ventura County, California.

On the behalf of the former Skybility Inc., I would like to thank you for your past support. For the future, CalAmp's M2M team looks forward to providing you with cutting edge technologies, integrated product solutions and competitively priced products.

Best Regards,

A handwritten signature in black ink, appearing to read "Patrick Hutchins", written over a horizontal line.

Patrick Hutchins  
President  
Products Division  
CalAmp Corp.
