Declaration on Electrically Identical Models

TO WHOM IT MAY CONCERN

We, *Digital Security Controls*, declare on our sole responsibility that the new models **TL2803GR, 3G2080R, TL2803G and 3G2080** with FCC ID: **F53123G260R** and IC: **160A-3G260R**

are all identical in hardware (UA601 Rev. 03) and software Ver 4.0

The only differences between the four different marketing model names are:

- Model **TL2803GR** is equipped with an IP and a 3G alarm communication channel and can connect to a third party application through an RS-422 interface,
- Model **3G2080R** is similar to TL2803GR model but it is equipped only with 3G communication channel (IP circuitry is depopulated),
- Model **TL2803G** is equipped with an IP and a 3G alarm communication channel identical to the TL2803GR model but it does not have the RS-422 interface populated.
- Model **3G2080** is similar to TL2803GR model but it is equipped only with a 3G communication channel and it does not have the RS-422 interface populated.

These new models are also identical in construction and performance with the currently FCC/IC registered models **TL2603GR, 3G2060R, TL2603G and 3G2060** that are already filled under the same FCC/IC ID's as mentioned above. The only difference between the two series of models is the marketing name and the DSC compatible control panels series with which these alarm communicators are compatible with. The "280" series is compatible with NEO Power Series Alarm Control Panels while the "260" series is compatible with Power Series Alarm Control Panels.

We attest that above difference are not relevant for any RF behaviour subject to regulatory items. Additional Spurious Emissions measurements on representative configurations have been performed to justify.

Therefore the provided test reports remain applicable for all four models.

If you have any questions, please feel free to contact us at the address shown below

Sincerely,

A handwritten signature in black ink, appearing to read "Dan Nita", is written over a horizontal line.
