

Label Design

Michelin *eTire* Model: DBRPL1.0

FCC ID: FI5-DBRPL10 IC: 5056A-DBRPL10

This device complies with part 15 of the FCC Rules and with RSS-210 of Industry Canada. Operation is subject to the following 2 conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operations.

Label Placement

The drive-by-reader cabinet is designed to be installed outdoors, typically at commercial fleet truck depots. The label will be placed inside the equipment bay of the enclosure, as indicated in the figure 1. In this location, it is protected from weather and the dusty environment, which could otherwise cause a quick delamination, fading and degradation of legibility of the label.
