

Connecting to a Bluetooth Device

Your tablet PC can connect and communicate with other Bluetooth-enabled devices.

To add a device, follow the steps below:

1. Open the Quick Settings menu. Then tap on the Bluetooth icon to enable the function.

2. Tap the arrow icon >) next to the Bluetooth icon.
3. Select the device you want to connect. Then, follow the on-screen instructions to pair the devices.

NOTE

- The pairing method varies depending on the type of device you are pairing. You may be prompted to enter the pairing code, confirm the pairing code, or the device will pair automatically. For example,

When the pairing process is complete, the connection status will show "Connected".

NOTE

- If the device you want to pair does not appear on the screen, please check that it is turned on and discoverable.
- Most Bluetooth-enabled devices need to be paired with your tablet PC. The PIN you enter on the tablet PC must be the same PIN to be entered on the other Bluetooth device.
- Once the device has been paired with your tablet PC, connecting to the same device again will no longer require you to enter the PIN.
- To disconnect from the Bluetooth-enabled device, select the device in the Bluetooth menu (**Settings > Bluetooth & devices**), tap the three horizontal dots (...), and tap **Remove device**.

Connecting to a Wireless Local Area Network

Your tablet PC comes with a WLAN module. A wireless network can be added either when the network is detected or by manually entering the settings information.

To connect, follow the steps below:

1. Open the Quick Settings menu (refer to page 43). Then tap **Wi-Fi** to enable the function.

2. Tap the arrow icon > next to the Wi-Fi icon.
3. Tap the desired wireless network.

4. Tap **Connect**.
Some networks require a network security key or a password.

TIP

Check the **Connect automatically** box to automatically connect to the desired network when it is available.

5. Enter the network security key.

6. Tap **Next**. After the connection is established, you can see the wireless icon

Making Connections

() on the taskbar.

NOTE

- Wi-Fi access requires service from a wireless service provider. Contact your service provider for more information.
- Actual wireless connectivity will depend on the system configuration. Please contact your dealer for more information.
- To disconnect from the wireless network, select the network in the wireless network list and tap **Disconnect**.

Connecting to a Wireless Wide Area Network (WWAN)

The **WWAN** function allows your tablet PC to connect to the Internet using mobile or cellular data networks.

To connect, follow the steps below:

1. Insert a valid SIM card into the SIM card slot.

2. Open the Quick Settings menu. Then tap **Cellular** to enable the function.

3. Tap the arrow (➤) next to the **Cellular** icon.
4. Select the mobile network carrier to establish the connection.

TIP

Check the **Let Windows keep me connected** box to allow the system to automatically connect to this mobile data network.

Using the BIOS Setup Utility

Your tablet PC has a BIOS setup utility which allows you to configure important system settings, including settings for various optional functions on the tablet PC. This chapter explains how to use the BIOS setup utility.

BIOS Setup Menu

The BIOS setup utility allows you to configure your tablet PC's basic settings. When you turn your tablet PC on, the system reads this information to initialize the hardware so that it can operate correctly. Use the BIOS setup utility to change your tablet start-up configuration. For example, you can change the system's security and power management routines.

Starting the BIOS Setup Utility

You can only enter the BIOS setup utility as the tablet PC is booting, i.e., between the time you turn on the tablet PC and before the Windows interface appears.

If your tablet PC is already on, shut down your tablet PC completely (power off) and restart it and then perform one of the following steps to enter the BIOS homepage:

- When the DURABOOK logo appears, tap **FrontPg** on the upper right corner of the screen.
- Press the **Esc** button on the keyboard.

From the BIOS homepage, select **Setup Utility**.

NOTE

- If you want to use a keyboard, you will have to connect your device with an external keyboard first before starting the BIOS setup utility.

Navigating and Entering Information in BIOS

Use the following buttons, found at the bottom of the BIOS screen, to move between fields and enter information:

Keyboard	Description
F1	Help
Esc ↑	Exit
↓	Select Item
□ □	Select Item
F5 / F6	Change Values
Enter / Double-click	Select Sub-menu
F9	Setup Defaults
F10	Save & Exit
F3	Search

Users are allowed to enter new values to replace the default settings in certain fields. The rest of the fields are specified by system default parameters and cannot be modified by users. Reverse the attribute of the main options and press the **Enter** button to enter into the submenu. Press the **Esc** button to return to the previous configuration page without saving BIOS settings. To display the Help screen at any time, simply press the **F1** button.

BIOS Homepage

From the BIOS homepage, you can choose how you want your tablet PC to boot up and change related settings.

Item	Description
Continue	Select this option to continue to booting process.
Boot Manager	Select this option to enter the Boot Manager.
Device Management	Select this option to enter the Device Manager.
Boot From File	Select this option to boot the system from a file or device.
Administer Secure Boot	Select this option to go to Administer Secure Boot.
Setup Utility	Select this option to go to Setup Utility.
