

FCC ID: G6D3700H-R01

Circuit Description

The 49.86MHz crystal oscillator drives the base of Q1 the final/buffer amplifier. The modulation provided by Mic. The output of Q2 has the matching network consisting of L4 and C7 that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground and Power Source

The antenna consists of a 39cm long matel antenna. There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a3Volt ("AA" size battery x 2) primary storage cell.
