Hi Alice,

These are the results of the technical review of this application. Please respond with information and further granting will happen. If you have any questions please let me know.

1. The spectral plot does not clearly demonstrate compliance at the bandedges, as required by Section 15.227(b). Please submit a new plot, using the Marker-Delta function, that clearly demonstrates that the field strength of the emission just outside of the authorized bandedges complies with Section 15.209.

Have a good day.

Mariannne
