What's in the box

What you'll need

Wi-Fi ID and password

You'll need the network name and its password. If you prefer a wired connection, you'll need an Ethernet cable.

IMPORTANT!

This device must be setup at your business location.

The internet connection needs to be at the business location as it is used to set up the location of the device and can be updated in settings twice in a 12-month period.

Set up the device

1

Plug HDMI cable into the device and your TV.*

2

Plug the power supply into the device and the other end into an outlet.**

Connect to network via Ethernet or via Wi-Fi during the device setup.

3

Turn TV on, and switch to proper input using your TV remote.

4

Now, follow the on-screen prompts to continue setup. This process includes such steps as remote pairing, network setup, time zone, software updates, accepting terms of service and establishing business location. It can take several minutes to complete.

* Device should be installed ensuring proper ventilation. Device should not be installed in a sealed environment or an environment with restricted airflow.

** Device should only be used with the provided power supply.
