

EXHIBIT A
[FCC Ref. 2.1033(b)(3)]

"Installation and Operating Instructions
Furnished to the User"

Exhibit A(1) - User's Guide

Important Information

Equipment Approval Information

Your telephone equipment is approved for connection to the Public Switched Telephone Network and is in compliance with parts 15 and 68, FCC Rules and Regulations and the Technical Requirements for Telephone Terminal Equipment published by ACTA.

1 Notification to the Local Telephone Company

On the bottom of this equipment is a label indicating, among other information, the US number and Ringer Equivalence Number (REN) for the equipment. You must, upon request, provide this information to your telephone company.

The REN is useful in determining the number of devices you may connect to your telephone line and still have all of these devices ring when your telephone number is called. In most (but not all) areas, the sum of the RENs of all devices connected to one line should not exceed 5. To be certain of the number of devices you may connect to your line as determined by the REN, you should contact your local telephone company.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

Notes

- This equipment may not be used on coin service provided by the telephone company.
- Party lines are subject to state tariffs, and therefore, you may not be able to use your own telephone equipment if you are on a party line. Check with your local telephone company.
- Notice must be given to the telephone company upon permanent disconnection of your telephone from your line.
- If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this product does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

2 Rights of the Telephone Company

Should your equipment cause trouble on your line which may harm the telephone network, the telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where prior notice is not practicable and the circumstances warrant such action, the telephone company may temporarily discontinue service immediately. In case of such temporary discontinuance, the telephone company must: (1) promptly notify you of such temporary discontinuance; (2) afford you the opportunity to correct the situation; and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set forth in Subpart E of Part 68, FCC Rules and Regulations.

The telephone company may make changes in its communications facilities, equipment, operations or procedures where such action is required in the operation of its business and not inconsistent with FCC Rules and Regulations. If these changes are expected to affect the use or performance of your telephone equipment, the telephone company must give you adequate notice, in writing, to allow you to maintain uninterrupted service.

Interference Information

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference; and (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna (that is, the antenna for radio or television that is "receiving" the interference).
- Reorient or relocate and increase the separation between the telecommunications equipment and receiving antenna.
- Connect the telecommunications equipment into an outlet on a circuit different from that to which the receiving antenna is connected.

If these measures do not eliminate the interference, please consult your dealer or an experienced radio/television technician for additional suggestions. Also, the Federal Communications Commission has prepared a helpful booklet, "How To Identify and Resolve Radio/TV Interference Problems." This booklet is available from the U.S. Government Printing Office, Washington, D.C. 20402. Please specify stock number 004-000-00345-4 when ordering copies.

If you are caught driving while using a handheld telephone, you may be fined, your license may be suspended, and you may be liable for damages.

TELEPHONE JACK REQUIREMENTS

There are three types of telephone jacks: wall, modular, and modular with a built-in jack. The wall jack is the most common type of jack. The modular jack is a jack that is used in a modular telephone. The modular with a built-in jack is a jack that is used in a modular telephone with a built-in jack.

INSTALLATION NOTE: When you install the telephone, make sure that the telephone is connected to the correct type of jack. If you connect the telephone to the wrong type of jack, the telephone may not work properly. If you connect the telephone to the wrong type of jack, the telephone may not work properly.

DIGITAL SECURITY SYSTEM

The digital security system is a system that allows you to lock the telephone out of operation. This system is designed to protect your telephone from unauthorized use. To use the digital security system, you must first set up the system. Once you have set up the system, you can use the system to lock the telephone out of operation.

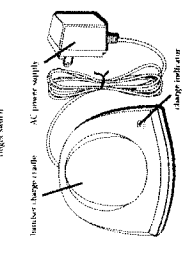

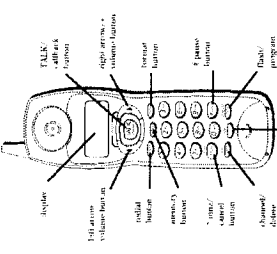

HEARING AID COMPATIBILITY (HAC)

The hearing aid compatibility (HAC) rating is a measure of the telephone's ability to work with hearing aids. The HAC rating is determined by the telephone manufacturer. The HAC rating is a measure of the telephone's ability to work with hearing aids. The HAC rating is a measure of the telephone's ability to work with hearing aids.

HANDSET AND CHARGE CRADLE LAYOUT

BASE LAYOUT

The base layout is shown in the diagram. The base is shown with labels for the CHARGE button, CALL button, and CALL WAITING button. The diagram also shows the location of the base's power supply and the base's antenna.

IMPORTANT INSTALLATION INFORMATION

When you install the telephone, make sure that the telephone is connected to the correct type of jack. If you connect the telephone to the wrong type of jack, the telephone may not work properly. If you connect the telephone to the wrong type of jack, the telephone may not work properly.

GUIDELINES

The guidelines for the telephone are as follows: 1. Do not use the telephone when you are driving. 2. Do not use the telephone when you are operating heavy machinery. 3. Do not use the telephone when you are operating a vehicle. 4. Do not use the telephone when you are operating a machine. 5. Do not use the telephone when you are operating a device.

INSTALLING THE PHONE

NOTE: The telephone is designed to be used in a standard telephone outlet. If you are using a standard telephone outlet, you do not need to install the telephone. If you are using a non-standard telephone outlet, you may need to install the telephone. If you are using a non-standard telephone outlet, you may need to install the telephone.

CONNECTING THE AC (ELECTRICAL) POWER

1. Plug the power supply into the power jack on the bottom of the base. 2. Plug the power supply into the power jack on the bottom of the base. 3. Plug the power supply into the power jack on the bottom of the base.

WALL MOUNTING THE BASE

NOTE: The base is designed to be mounted on a wall. If you are mounting the base on a wall, you must use the wall mounting kit that is included in the package. If you are mounting the base on a wall, you must use the wall mounting kit that is included in the package.

LANGUAGE

The telephone has two language options: English and Spanish. To change the language, you must use the language selection button on the handset. To change the language, you must use the language selection button on the handset.

AREA CODE

The telephone has a memory for the area code. To store the area code, you must use the area code memory button on the handset. To store the area code, you must use the area code memory button on the handset.

RECEIVING AND STORING CID CALLS

NOTE: The telephone is designed to receive and store caller ID (CID) calls. To receive and store CID calls, you must use the CID memory button on the handset. To receive and store CID calls, you must use the CID memory button on the handset.

CALLER ID (CID)

The caller ID (CID) feature allows you to see the caller's name and number on the handset. To use the CID feature, you must use the CID memory button on the handset. To use the CID feature, you must use the CID memory button on the handset.

CALLER ID WITH CALL WAITING

The caller ID with call waiting feature allows you to see the caller's name and number on the handset while you are on a call. To use the caller ID with call waiting feature, you must use the CID memory button on the handset. To use the caller ID with call waiting feature, you must use the CID memory button on the handset.

TEMPORARY TONE

The temporary tone feature allows you to use a temporary tone when you are on a call. To use the temporary tone feature, you must use the temporary tone button on the handset. To use the temporary tone feature, you must use the temporary tone button on the handset.

CALLER ID (CID)

The caller ID (CID) feature allows you to see the caller's name and number on the handset. To use the CID feature, you must use the CID memory button on the handset. To use the CID feature, you must use the CID memory button on the handset.

RECEIVING AND STORING CID CALLS

NOTE: The telephone is designed to receive and store caller ID (CID) calls. To receive and store CID calls, you must use the CID memory button on the handset. To receive and store CID calls, you must use the CID memory button on the handset.

CALLER ID (CID)

The caller ID (CID) feature allows you to see the caller's name and number on the handset. To use the CID feature, you must use the CID memory button on the handset. To use the CID feature, you must use the CID memory button on the handset.

CALLER ID WITH CALL WAITING

The caller ID with call waiting feature allows you to see the caller's name and number on the handset while you are on a call. To use the caller ID with call waiting feature, you must use the CID memory button on the handset. To use the caller ID with call waiting feature, you must use the CID memory button on the handset.

TEMPORARY TONE

The temporary tone feature allows you to use a temporary tone when you are on a call. To use the temporary tone feature, you must use the temporary tone button on the handset. To use the temporary tone feature, you must use the temporary tone button on the handset.

CALLER ID (CID)

The caller ID (CID) feature allows you to see the caller's name and number on the handset. To use the CID feature, you must use the CID memory button on the handset. To use the CID feature, you must use the CID memory button on the handset.

REVIEWING CID RECORDS

NOTE: The telephone is designed to review the caller ID (CID) records. To review the CID records, you must use the CID review button on the handset. To review the CID records, you must use the CID review button on the handset.

REVIEWING CID RECORDS

The reviewing CID records feature allows you to see the caller's name and number on the handset. To use the reviewing CID records feature, you must use the CID review button on the handset. To use the reviewing CID records feature, you must use the CID review button on the handset.

REVIEWING CID RECORDS

The reviewing CID records feature allows you to see the caller's name and number on the handset. To use the reviewing CID records feature, you must use the CID review button on the handset. To use the reviewing CID records feature, you must use the CID review button on the handset.

The reviewing CID records feature allows you to see the caller's name and number on the handset. To use the reviewing CID records feature, you must use the CID review button on the handset. To use the reviewing CID records feature, you must use the CID review button on the handset.

REVIEWING CID RECORDS

The reviewing CID records feature allows you to see the caller's name and number on the handset. To use the reviewing CID records feature, you must use the CID review button on the handset. To use the reviewing CID records feature, you must use the CID review button on the handset.

GENERAL PRODUCT CARE

To keep your telephone working and looking good, follow these guidelines:

- Avoid putting the phone near heating appliances and devices that generate electrical noise (for example, motors or fluorescent lamps).
- DO NOT expose to direct sunlight or moisture.
- Avoid dropping the handset, as well as other rough treatment to the phone.
- Clean the phone with a soft cloth.
- Never use a strong cleaning agent or abrasive powder because this will damage the finish.
- Retain the original packaging in case you need to ship the phone at a later date.

SERVICE

This product may be serviced only by the manufacturer or its authorized service agents. Changes or modifications not expressly approved by ATLINKS USA, Inc. could void the user's authority to operate this product. For instructions on how to obtain service, refer to the warranty included in this guide or call customer service at **1-800-448-0329**.
