Date of Test: 3/30-31/00 & 4/6/00

1 JOB DESCRIPTION

1.1 Client Information

The EUT has been tested at the request of

Company: Sonus Telecom, Inc.
123 Bldg., 2-Dong, Suite 714, 75-1 Gochuck-Dong
Youngdungpo-Gu, Seoul
Korea

Name of contact: Bryan Lee
Telephone: (822) 6090-3000
Fax: (822) 6090-3002

1.2 Equipment under test (EUT)

Equipment type: Cordless Telephone system

Equipment class: Low Power transmitter

Model number(s): GH2400N

FCC ID: OU3GH2400N

Manufacturer: SAME as above.

Use of Product : Voice communications

Production is planned: ☒ Yes, ☐ No

Technical Specifications:

Type of Emission	
Modulation	Analog
Range of RF Output	0.5 W (Peak EIRP)
Means for variation of operating power	None
Frequency Range	to MHz
Max. number of Channels	
Antenna	Handset: Base Unit:
Detachable antenna ?	No
External input	• Audio Voice • PSTN

Intertek Testing Services

1365 Adams Court, Menlo Park, CA 94025

Sonus Telecom, Inc., Cordless Telephone, FCC ID: 0U3GH2400N

Date of Test: 3/30-31/00 & 4/6/00

EUT receive date: March 30, 2000

EUT received condition: Good condition prototype

Test start date: March 30, 2000

Test end date: April 6, 2000

1.3 Test plan reference

FCC Part 2.1033, FCC Part 15.249

1.4 System test configuration

1.4.1 System block diagram & Support equipment

The diagrams shown below details the placement of the equipment under test on the turntable.

S:	Shielded	U:	Unshield	F:	With Ferrite Core
Support equipment					
Equip. #	Equipment	Manufacturer	Model #	S/N #	FCC ID
1	Telephone Simulator				NA

1.4.2 Justification

The system was configured for testing in a typical manner in accordance with ANSI C63.4 standard.

For emission testing, the equipment under test (EUT) was configured for testing in a typical fashion (as a customer would normally use it). During testing, all cables were manipulated to produce worst case emissions.

1.4.3 Mode(s) of operation

The handset and Base unit was powered from fully charged batteries and AC adapter. During tests, EUT was operating at continuous transmitting mode.

1.5 Modifications required for compliance

No modifications were implemented by Intertek Testing Services.

2 TEST SUMMARY

FCC RULE	DESCRIPTION OF TEST	RESULT	PAGE

Base Unit			
15.249a	Field Strength of Emissions	DB(μ V/m)	5
15.249c	Field Strength of Spurious Radiation	Worst case Freq.: MHz Margin: dB	6
15.203	Antenna requirement	Complies	8
15.205	Restricted bands of operation	Worst case Freq.: MHz Margin: dB	
15.207	Line Conducted Emissions	Worst case Freq.: MHz Margin: dB	9

3 FIELD STRENGTH OF EMISSIONS

3.1 Test Description

Parameter:	FCC § 15.249a
Requirement:	FCC § 15.249a
Fundamental: Harmonics	

3.2 Test Procedure

For the measurements, the EUT is attached to a cardboard box (if necessary) and placed on the wooden turntable which is 0.8m above the ground plane on an open site. If the EUT attaches to peripherals, they are connected and operational (as typical as possible). The EUT is wired to transmit full power.

The signal is maximized through rotation and placement in the three orthogonal axes. The antenna height and polarization are varied during the search for maximum signal level. The antenna height is varied from 1 to 4 meters. Radiated emissions are taken at three meters unless the signal level is too low for measurement at that distance. If necessary, a pre-amplifier is used and/or the test is conducted at a closer distance. All readings are extrapolated back to the equivalent three meter reading using inverse scaling with distance.

Radiated emission measurements were performed from 30 MHz to the 10th harmonic of transmitter frequency. Analyzer resolution is 100 kHz or greater for 30 MHz to 1000 MHz, 1 MHz for >1000 MHz.

Measurements were performed for lowest and highest channels.

3.3 Test Results

See attached.

3.4 Modifications made during testing

None

4 SPURIOUS EMISSIONS (EXCEPT HARMONICS)

4.1 Test Description

Parameter:	FCC § 15.249c
Requirement:	FCC § 15.249c
Attenuation limits:	≤ 50 dB or FCC § 15.209

4.2 Test Procedure

For measurement below 1 GHz, the EUT was placed inside a TEM cell (stripline) connected to a spectrum analyzer from one side and to 50 ohm termination from one side and to 50 ohm termination from another. For measurement above 1 GHz, a horn antenna was placed at a distance of 10-15 cm from EUT and connected to a spectrum analyzer. Several plots were made to show emissions from 1 MHz up to 10th harmonic.

4.3 Test Results

See attached plots.

None

6 AC LINE CONDUCTED EMISSIONS

6.1 Test description

Parameter:	ANSI C63.4
Requirement:	FCC § 15.207
Limits:	≤ 250 µV within the band 450 kHz to 30 MHz

6.2 Test Procedure

The EUT was connected to the DC power supply, that was connected to the AC line through the LISNs. Both HOT and NEUTRAL leads were tested.

AC line conducted emission measurements were performed from 0.45 MHz to 30 MHz. Analyzer resolution is 10 kHz or greater.

6.3 Test Results

Handset	Base Unit
Not applicable, EUT is battery powered only	See attached. Passed by 4.7 dB

6.4 Modifications made during testing
