6) Install from SD card Install the encrypted certificate from SD card.

7) set password Set or change Certificate store password

8) clear storage Clear all the contents of the certificate store and reset their passwords.

• Languages and keyboard

1) Selecting Language District. This includes all the languages on the phone and for a total amount of 12.

2) Custom Dictionary Add or delete words to custom dictionary.

3) Keyboard Settings Vibrating when buttons are pressed, Playing sound when

buttons are pressed, Capitalizing automatically, Speech Input (by microphone on the

keyboard), Inputting words (speech can be altered by sliding finger on space key).

• Backup & reset

1) Backup I data will application data, WLAN password and other Settings backup to Google's servers

2) Resetting to Factory Settings, Clear all data stored on the phone.

• Add account

a. Corporate

- b. Email
- c. Google

• **Date and Time**

- 1) Automatic Use date and time provided by Network.
- 2) Setting Date Touch "+" and "-" to set date.
- 3) Selecting Time Zone Select Time Zone according to where you are. For China please select "GMT+08:00, China Standard Time".
- 4) Setting Time Touch "+" and "-" to set time.
- 5) Use 24 Hour Time Format ON/OFF
- 6) Select Date Format There are 3 kinds of formats you can choose from: Month-Day-Year, Day-Month-Year and Year-Month-Day, among which Year-Month-Day is the default setting.

• **Schedule power on/off**

You can set time of boot or shutdown by touching it. You may also select to repeat it or a certain day during a week.

• **Accessibility**

- 1) Large text
- 2) Power button ends call: According to the "power" button to end the call to open, call, press the "power" will end the call and not shut down the screen
- 3) Auto-rotate screen
- 4) Voice passwords
- 5) Touch & hold delay
- 6) Install web scripts
- 7) Quick boot

• **Developer options**

- a. USB Debugging: USB debugging only for development and USB disk.
- b. Stay awake: Screen will never sleep while charging.
- c. Allow mock locations
- d. Desktop backup password
- e. Strict mode enabled
- f. Pointer location
- g. Show touches
- h. Show screen updates
- i. Show CPU usage
- j. Force GPU rendering
- k. Window animation scale:
- l. Transition animation scale
- m. Don't keep activities
- n. Background process limit
- o. Show all APRs

• **About phone**

You can check the information on status bar and remaining power.

19. Notices for the use of phone

Your phone is a product of superior design and craftsmanship and should be treated with care. The following suggestions can help you comply with the terms of repair kits, to extend the life of mobile phone.

- 1) Place the mobile phone and their parts and components out of reach of small children.
- 1) Keep the phone dry, rain, humidity and all types of liquids which contain minerals will corrode electronic circuits.
- 2) Don't touch the phone with wet hands when charging, it will cause electric shock or damage the phone.
- 3) Avoid place the device in high temperature environment. Temperatures will shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- 4) Avoid place the device in too low temperature environment. When the temperature rises, the phone will produce water vapour that may damage electronic circuit.
- 5) Avoid place the phone in dusty, dirty places, otherwise parts may be damaged.
- 6) To avoid the phone in a lit cigarette, near open flame or any heat source.
- 7) Do not open the device, non-professional approach will do damage to the phone.
- 8) Do not throw it from height, knock or shake the phone, rough handling can damage internal circuit boards.
- 9) Do not paint the phone, because the paint will block headphones, microphones or other removable parts, and lead it not work.
- 10) Use clean, soft, dry cloth to clean the camera, light sensor lenses. Prohibit the use of harmful chemicals and cleaning agents, cleaning fluids to clean the phone
- 11) If mobile phone, battery, charger, or mobile phone accessories are defective, send to the nearest qualified service center for inspection.
- 12) If necessary, Service Centre staff will assist you and will arrange for phone repairs.

FCC Caution.

§ 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This mobile phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: MAX5.0(FCC ID:GAO-MAX50) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.29W/kg and when properly worn on the body is 0.79W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.0cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.0cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 1.0 cm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
