3 E.U.T INFORMATION

a. E.U.T description

1.1 The SA-02 Door/Window Detector is a small door or window frame mounted security device – to be installed in residential and small commercial establishments.

1.2 The SA-02 is a stand-alone unit, operating only on internal battery power supply. The unit consists of one (1) PCB, one (1) microcontroller – which controls the detector operation, and a RF transmitter section. The unit does not have a RF receiver section.

1.3 The SA-02 Door/Window Detector has one RF channel, at 433.92 Mhz carrier with OOK modulation.

1.4 The SA-02 Door/Window Detector in active mode transmits identification and status signals in 100ms. A supervisory transmission from the SA-02 to the control panel occurs for the same time of one transmission (100 ms), every 20 minutes per hour.

1.5 The battery used is 3vdc lithium, CR123A - replaceable.
