Circuit Description

Q1 the 27 MHz crystal oscillator drives the base of Q2 the final/ buffer amplifier. Summed into the same base (Q2) is the modulation provided by IC1. The inputs of IC1 is manually switched by the operator.

Antenna, Ground, and Power Source

The antenna consists of a 56cm long telescoping chrome over brass tubing. There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a 12 Volt primary storage cell
