

INSTRUCTION MANUAL

1. BATTERY INSTALLATION :

- 1. From the outside of CAR & TRANSMITTER to "ON"

CAR

- 1. Remove the battery compartment's back end of the cover.
- 2. Put right AA battery (Alkaline or Nickel Cadmium) in the battery bin, be sure to match the + - symbols.
- 3. Put back the battery door to the compartment correctly.
- 4. Replace the cover and lock the pin.

TRANSMITTER

- 1. Remove the battery cover by sliding the latch in the direction of the arrow.
- 2. Put one 6V battery in the compartment. Be sure to match the + - symbols.
- 3. Replace the cover and lock properly.

2. CHARGING THE MODEL-CADMIUM BATTERIES :

- 1. If the CAR runs slowly or does not move at all, recharge the nickel cadmium batteries.
- 2. To recharge the batteries you need a battery charger (adapter).

Connect your model to the charger pin to connect the right charger.

PRECAUTIONS

- 1. When the charger's panel plug fits the battery for charging pin, and PLUG the charger's other end into a standard AC outlet.

RADIO CONTROLLED RACER WITH TURBO POWER

3. SAFETY GUIDES AND HINTS

- 1. Never operate your car in the street, in water, sand or on thick carpet. Do not allow it to go through rain, wet and be soaked inside.
- 2. Do not allow the car to fall off a high ledge that might damage it.
- 3. Never disassemble your car or the transmitter.
- 4. Do not allow the car without cover a source of heat or to direct sun for an extended period.
- 5. If the car moves poorly and you have installed new batteries, check if the wheels pin up the threads, test it out. Remove such materials from the wheel carefully.
- 6. When the car runs down, or the control range decreases, change for new batteries.
- 7. For maximum battery life, be sure to rest your car after 15 minutes of continuous racing. We recommend a rest period of approximately 30 minutes.
- 8. Since the unit operates in FM/AM, you may experience from (a) radio static is in the same band of frequency. Under such conditions, better change location or wait until interference ceases. Also less or more FCC class (c) or other devices (control operates in the same area, they will interfere each other).
- 9. Range of transmitter will depend on surroundings, buildings, and large metal objects. You will obtain the best result to operate in open area.
- 10. When not in use, leave both the car and the transmitter Power Switches "OFF". If you do not intend to use the car for a long time, remove the batteries : weak or dead batteries can lead damaging chemicals.

4. OPERATION

- 1. Extend the telescopic antenna of the controller to full length.
- 2. For maximum range of control always keep both antennae straight up.
- 3. Set the car and transmitter power switches to "ON". The controller is shown by RED indicator. The car is ready to run.
- 4. Use the transmitter's control sticks to steer the car.

CAUTION :

- 1. All batteries must be installed with proper polarity (+ and -).
- 2. Never mix Alkaline, Rechargeable (Nickel-Cadmium), or Standard (Carbon-Zinc) batteries.
- 3. Only same type of batteries is to be used.
- 4. Do not mix new with old batteries.
- 5. Remove exhausted batteries from the car.
- 6. Be sure the battery bin is properly connected or installed.
- 7. Charge only Nickel Cadmium batteries. Recharging any other batteries could cause serious damage and possibly an explosion.
- 8. Excessive recharging can possibly damage the batteries and may be dangerous.
- 9. Do not charge the battery pack or battery box immediately after use. Allow it to cool first.
- 10. Do not use the battery charger to heat or hot items.
- 11. Use the charger in areas where there is no fire.
- 12. Charging time will depend on the type of batteries used. You MUST read the instruction written on the batteries carefully before recharging them to avoid harmful result.
- 13. Rechargeable batteries are to be removed from the RC model after being charged.
- 14. Rechargeable batteries are only to be recharged under adult supervision.
- 15. Non-rechargeable batteries are not to be recharged.
- 16. The toy is not to be connected to more than recommended number of power supplies.
- 17. The packaging has to be kept close if contains important information.

- CAR CONTROL SYSTEM**
- 1. Battery compartment
 - 2. Motor
 - 3. Receiver unit
 - 4. Antenna

- TRANSMITTER CONTROL SYSTEM**
- 1. Battery compartment
 - 2. Motor
 - 3. Receiver unit
 - 4. Antenna
