

FCC ID: GSA-SPD2000NS

In reply to e-mail dated November 2, 2006

Dear Mr. Graff,
Below is the answers to your questions.

1. Please refer to "SPD2000_Operational description_rev1" uploaded via "Operational description" folder, "SPD2000 Guide - DE3650_V11" uploaded via "User guide" folder, "VISRAD_FCC.16646_rev1" test report uploaded via "Test report" folder.

The detector transmits continuously with 30 s intervals only during alarm condition (movement or tamper alarm) qualified as emergencies involving security; therefore the "emergency condition" provisions of 15.231(a)(4) may be applied. Please review.

2. Please refer to "Authorization Letter_Visonic" uploaded via "Additional information" folder.

3. Unfortunately, we have no test setup photos of better quality.

With great respect,

Natasha
