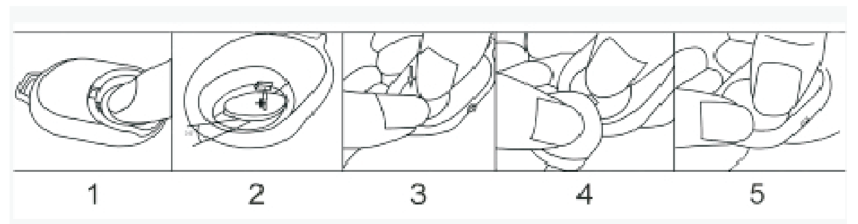
2. Smartphone clamp mounting screw
3. Wheel to tighten screw
4. Knob to adjust base
5. LED indicator light
6. **[iOS]** shutter button
7. **[Android]** shutter button
8. ON/OFF switch

INSERTING THE BATTERY



The battery for the Wireless Remote Shutter (1 CR2032 lithium battery) is included.

1. To insert the battery, push and slide out the battery door on the remote control.

2. Insert the battery with the polarity "+" facing up.

3. Slide the battery door back into place.

PAIRING THE SHUTTER STICK

1. Slide the power switch on the Wireless Remote Shutter to the ON position.
2. The LED indicator light will flash BLUE.
3. Keep the remote and Bluetooth enabled device within 3 feet of each other during the pairing process.
4. Set your Bluetooth enabled device to search for Bluetooth devices.

If there are no paired devices in range when the Shutter Stick is turned on, it will go into pairing mode automatically. If a paired device is in range, the Monopod will connect to it automatically.

Searching for devices

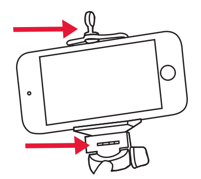
1 found

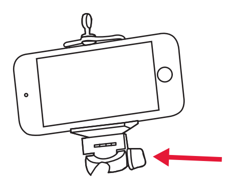
5. When the Bluetooth enabled device finds the Shutter Stick, select "PCA3202" from the list of found devices.
6. If required, enter the password 0000. Select OK or Yes to pair the two units.
7. After a successful registration, the LED indicator light will shut off.

NOTE: If you would like to connect the Shutter Stick to another device, you must unpair the Shutter Stick from the currently paired device first. On your device's Bluetooth settings, select "PCA3202," then select "unpair." When the Shutter Stick has been unpaired, turn it OFF and then ON again to enter pairing mode again.

The screenshots above are typical of many Bluetooth enabled devices in the market today, and are used to assist in the explanation of the pairing process. Your Bluetooth enabled device's interface and interaction with the Shutter Stick may slightly differ from the illustrations above.

USING THE SHUTTER STICK





1. Attach the phone clamp to the mounting screw by rotating the wheel until it is tight.

2. Put your smartphone in the phone clamp. The spring clamp will keep your smartphone securely in place.

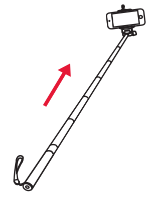
3. Loosen the knob on the base to adjust the angle of the smartphone clamp, then tighten it to secure the clamp to the base.

4. Enter the camera app on your smartphone.

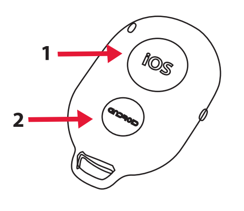
5. In your smartphone's camera app, switch the picture type to "Selfie" (front facing camera).

NOTE: You can take "selfies," take normal pictures, or record videos. Choose the settings in your smartphone's camera app.

USING THE SHUTTER STICK (cont'd)



6. Extend the Shutter Stick to the desired length.



7. Focus on yourself and press the appropriate shutter button on the remote.
   - Use the **[iOS]** button (1) if your smartphone is an iPhone.
   - Use the **[Android]** button (2) if your smartphone uses the Android operating system.

NOTE: On some Android phones, you may need to use the **[iOS]** shutter button to take pictures or video. If the **[Android]** shutter button does not work, then use the **[iOS]** shutter button.

IMPORTANT: If you are trying to take pictures and you see the volume control bar on your phone, this is because the Shutter Stick uses the volume frequency to take pictures. If this happens, open your smartphone's **CAMERA APP** settings, select "***Volume Button Options***" and select "***Capture***." Now the shutter button will take pictures.

TROUBLESHOOTING

My Bluetooth device is not able to pair with the Shutter Stick.

1. Make sure the Wireless Remote Shutter is turned ON before beginning the pairing process.
2. Keep the Wireless Remote Shutter and Bluetooth enabled device within 3 feet of each other during the pairing process.
3. The LED indicator light will flash BLUE.
4. Check that YOUR device's Bluetooth feature is turned ON.
5. Try repeating the pairing process. See "Pairing the Shutter Stick."

I cannot get the Shutter Stick into pairing mode.

1. Make sure the Wireless Remote Shutter is turned ON before beginning the pairing process.
2. The LED indicator light will flash BLUE.
3. The Shutter Stick is now in pairing mode.

The shutter button does not take pictures. I see the volume control on the phone.

1. The Shutter Stick uses the volume frequency to take pictures. If this happens, open your smartphone's **CAMERA APP** settings, select "***Volume Button Options***" and select "***Capture***." Now the shutter button will take pictures.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
