

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 This photograph shows the internal components of the EUT housing from a top-down perspective. The white plastic housing is open, revealing a green printed circuit board (PCB) with various electronic components. A large, circular, silver-colored component, likely a speaker or a large capacitor, is prominent on the left side of the board. The PCB is populated with numerous surface-mount components, including resistors, capacitors, and integrated circuits. A yellow component is visible near the center. The housing is placed on a blue surface, and a black ruler with white markings is positioned horizontally below the device for scale.
EUT Housing and Board View 2	 This photograph shows the internal components of the EUT housing from a bottom-up perspective. The white plastic housing is open, revealing the underside of the green printed circuit board (PCB). The PCB is populated with various electronic components, including resistors, capacitors, and integrated circuits. A large, circular, silver-colored component, likely a speaker or a large capacitor, is prominent on the left side of the board. The housing is placed on a blue surface, and a black ruler with white markings is positioned horizontally below the device for scale.

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) with various electronic components, including integrated circuits, resistors, and capacitors. The board is positioned horizontally against a blue background. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board has several circular holes and a complex pattern of soldered components.
Solder Board-Component View 2	 A photograph of the same green PCB from a different angle, showing the underside. This view highlights the solder joints and components on the reverse side, including several large, circular, gold-colored components. The board is again positioned horizontally against a blue background, with the same black ruler visible on the left for scale. The text "WPC20-2X40A REV1.0" and "20200929" is visible on the board.

Antenna View	 Wireless Charger Antenna This photograph shows the back cover of a device with the wireless charger antenna highlighted by a red rectangle. The antenna is a circular, pinkish-red coil. The back cover is white and is placed next to a black ruler for scale. The ruler has markings in millimeters and centimeters. The background is a blue surface.
Antenna View	 Wireless Charger Antenna This photograph shows the internal components of the device with the wireless charger antenna highlighted by a red rectangle. The antenna is a circular, pinkish-red coil. The internal components are visible, including the green PCB, various electronic components, and the battery. The device is placed next to a black ruler for scale. The background is a blue surface.
