

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. A power supply unit is connected to a device under test (DUT) on a wooden table. The DUT is a small electronic component with a green PCB and a black case. A power cord is plugged into a wall outlet. The setup is on a light-colored wooden surface.
Radiation Emission View (Below 30MHz)	 A photograph showing a radiation emission test setup. A device under test (DUT) is placed on a turntable inside an anechoic chamber. The chamber walls are covered with white, square-shaped absorbers. A metal frame is positioned around the turntable. A yellow and black striped caution tape is visible on the floor. A metal container is placed on the floor next to the turntable.
