> Question #1: FCC ID label location: The proposed FCC ID label location was

> proposed to be placed on the main control unit. This main control unit is

a

> receiver not the transmitter. As indicated in the test report, this main

> control unit is subject to FCC DoC procedure and it should be labeled in

> accordance with FCC DoC labeling requirement. Please revise your FCC ID

> label location by changing the location from main control unit to the

> transmitter.

>

> Question #2: In the operational description, it does not address periodic

> operation requirement. There is no information provided to justify that
> this transmitter will automatically deactivate the transmitter within not
> more than 5 seconds of being released or cease transmission within 5
seconds

> after activation. Please provide the technical information to comply this
> requirement.

>

> Best Regards
