

12/26/2016

Class II Permissive change is based on FCC ID: H78KPMT2PIT. The new FCC submission for 151MHz and 156MHz frequency range is based on the same units i.e. hardware and software that have been tested and approved by TIMCO which was qualified for FCC ID: H78KPMT2PIT . The new submission is just for different VHF frequencies (defined by the KP factory) while the 2.4GHz ISM band radio wasn't change i.e. the 2.4GHz radio parameter are fixed and can't be changed even at the production line..

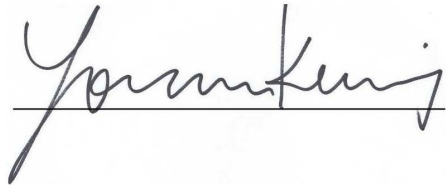

No hardware changes were made to the DUT. The added frequency range was added by software only.
