

Federal Communication Commission

Attestation Statement per 90.203(e) and (g)

Programming of transceiver frequencies can only be performed by the manufacturer or authorized service and maintenance personnel. The radio output power is fixed and can't be changed. In addition, there is no RF connector – just integrated internal antenna.

Sincerely,

Yoram Kenig

A handwritten signature in black ink, which appears to read 'Yoram Kenig', written over a horizontal line.
