THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRE OPERATION.

Federal Communications Commission Requirements

The equipment has been tested and found to comply with the limits for Class B Digital Device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

INTRODUCTION

Congratulations on your purchase!

Your new RF-Mouse R7 PowerSaver Office 7Keys is designed with R7 Extremely Low-Power Technology only requires 8mA electric current while others require 25mA. Wow! Just turn your mouse battery –life 3 times longer. Same time, R7 PowerSave performs high-speed RF technology with report rate of 125Hz [***Normal wireless optical mice performs with reports rate of only 90Hz (Tested by Mouse Rate Program)*] and it provides 24 office commands setting for you.

- **Package contains:**

R7 PowerSaver Wireless Optical Mouse

USB RF Receiver

USB Extension Cable

2 AAA Alkaline Batteries

User's Quick Guide

CD Driver

- **System Requirements:**

To use the mouse presenter, your computer must meet the following hardware requirements and run one of the operating system listed below.

Hardware

1. IBM or compatible system
2. UBS v1.1 or higher interface
3. Hard Disk Driver
4. USB Port

Operating System

Windows®98/Me/2000/2003/XP/x64

● **This user's guide describes how to:**

1. Connect the receiver to your computer
2. Set up the wireless link and use the mouse
- 3 .Install software driver

1. Press the tab on the bottom of the mouse cover as shown here and remove the cover.
2. Insert the supplied batteries, making sure that the positive (+) and negative (-) ends of the battery match the polarity indicators inside the battery housing.
3. Slide the batter cover back into position until it “clicks” firmly into place.

Step1

Step2

Step3

To connect the receiver

Insert the Receiver USB port connector into the available computer USB port. You can choose anyway to connect the USB receive with computer as blow:

For laptop computer usage:

Insert the USB mouse port connector into the USB port on laptop computer. Easy take and use.

For PC computer usage:

1. Insert the USB receive mouse port connector into the USB port on the USB extend cable (accessories),

2. Insert the USB receives mouse port connector into the USB HUB port.

Locating the USB RF-Mouse Receiver

Your RF-Mouse has limitations on the range or distance from its receiver. To make sure that your mouse sends and receives properly, refer to the following instructions:

1. For optimal performance, place the receiver at least 8 inches (20 centimeters) away from other electrical devices, such as the computer, the monitor, or external storage drives.
2. The RF-Mouse should be no farther than 4 feet (1.5 meter) from the mouse receiver. This will ensure optimal communication between the mouse and receiver.

Operating Hints: For optimal performance and RF reception:

1. Avoid using the mouse on a metal surface, Metals, such as iron, aluminum or copper, shield the radio frequency transmission and may slow down the mouse's response time or cause the mouse presenter to fail temporarily.
2. The mouse will enter a suspend mode at the same time your computer does, click a button on the mouse presenter to activate it.
3. Never use the mouse on a glass or mirrored surface as these surface will the mouse to fail temporarily

Establish Frequency Channel and ID Code

USB RF Mouse Receiver: launch frequency channel and ID code to RF-Mouse

Press and release the connect button on the front of USB receiver (shown as right image), the GREEN PWR LED light turns "Off" and starts "Blinking.
