Dear Helen:

Please refer our reply as below. Tks

Best Regard

Amanda

Question #1: This device is seeking modular approval. In the modular approval cover letter, it says "For mobile configuration only. Refer to MPE calculation in the test report.". However if you go back to check the report - section 7.5 RF Exposure, it checks "Portable" and "SAR evaluation", it says "MPE calculation is not applicable". Please explain.

Ans: Sorry, test report had been revised as attachment.

Question #2: The modular approval cover letter says "User shall be informed that keeping at least 20cm safe separation away the device." However there is no such statement in the user manual. Please revise the manual to include necessary RF exposure statements.

Question #3: The modular approval cover letter lists an incomplete requirement for item 6. Below is an excerpt from FCC Public Notice 00-1407:

"The modular transmitter must be labeled with its own FCC ID number, and, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization."

Either FCC ID label format or the user manual does not show how to label the host device when the module is installed inside the host and invisible. Please provide such information in the manual.

Question #4: The user manual does not provide any instruction on how to install the mini-PCI card and the antenna(s) that will be used with the device into the host devices. Please revise the manual to include the instruction and related information to OEM integrator in order to satisfy FCC 15.203 & 204 requirements.

Ans: Thank you for your advancing. It let me learning a lot thing and please refer the User manual for P66.

Best Regards,
Helen Zhao

The items indicated above must be submitted before processing can continue on the above
