Subject: Stability not required per 90.213 (a) Footnote 13

To the Commission:

The transmitter with FCC ID: H9PAR4126 is a non-multilateration system whereby an electronic device placed in a package transfers information from that device when the package passes near one of the system's antennas as such frequency Stability measurement is not required. The transmitter's emission is more than 40 kHz from the band edge for both the upper and lower band edges; the other requirement per 90.213 (a) Footnote 13.

Respectfully,

A handwritten signature in blue ink that reads "Mark S. Luksich". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Mark S. Luksich
