DON'T THROW THE BOX AWAY, IF YOU DO NOT FIND AN INSTRUCTION SHEET INCLUDED, YOU MAY FIND THE INFORMATION ON THE BOX.

- Carefully read your operating instruction every time before you play with your HOT RODS.
- Check all batteries before installation. Replace all batteries if anyone is damaged.
- Observe correct polarity marking in battery compartment during installation.
- When you finish operating your HOT RODS, set the ON/OFF switch to OFF. This saves battery power.
- If your HOT RODS moves slowly, or does not move at all, replace the batteries with fresh ones.
- For better performance, hold transmitter antenna up-right and not pointing at the vehicle.
- If the motor runs, but the HOT RODS does not respond to the controller, replace the controller's 9-volt battery.
- When you're not planning to play with the HOT RODS for a few days, remove the batteries from the HOT RODS and the controller. Never leave weak or dead batteries in either unit. The batteries might leak damaging chemicals.
- Do not use the HOT RODS on a wet floor or in mud or sand. Never play in streets with traffic.
- If a CB transceiver is being operated nearby, it might interfere with your control of the HOT RODS. If this happens, move your HOT RODS to a new location or wait until the CB unit stops transmitting.
- **CAUTION:** The user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
