Test Setup Details	
Setup Format	Tabletop
Measurement Method	Antenna Conducted
Type of Test Site	Tabletop
Notes	

Requirement
The bandwidth of the emission shall be no wider than 0.25% of the center frequency for devices operating above 70MHz and below 900MHz. For devices operating above 900MHz, the emission shall be no wider than 0.5% of the center frequency. Bandwidth is determined at the points 20dB down from the modulated carrier.

Procedure
1) The EUT was set to transmit continuously. 2) With an antenna positioned nearby, occupied bandwidth emissions were displayed on the receiver. 3) The resolution bandwidth was set to 10kHz, and span was set to 2MHz. 4) A screen capture was taken of the frequency spectrum near the carrier using a screen dump function on the receiver.

Mode	A Code, D Code, E Code, Linear Mega Code, Genie Code, Stanley Secure Code, Wayne-Dalton Code, Guardian XG Code, Sommer Code, Ryobi Code

Test Setup Details	
Setup Format	Tabletop
Measurement Method	Antenna Conducted
Type of Test Site	Tabletop
Notes	

Requirement
Per RSS-210, Annex A, Section A.1.3, the occupied bandwidth (99% Bandwidth) of momentarily operated devices shall be less than or equal to 0.25% of the center frequency for devices operating between 70MHz and 900MHz. For devices operating above 900MHz, the occupied bandwidth shall be less than or equal to 0.5% of the center frequency.

Procedure
The antenna port of the EUT was connected to the spectrum analyzer through attenuation. The EUT was allowed to transmit continuously. The transmit channel was set separately to low, middle, and high channels. The resolution bandwidth (RBW) was set to 1% to 5% of the actual occupied / x dB bandwidth, the video bandwidth (VBW) was set 3 times greater than the RBW, and the span was set large enough to capture all products of the modulation process, including the emission skirts, around the carrier frequency. The 'Max-Hold' function was engaged. The analyzer was allowed to scan until the envelope of the transmitter bandwidth was defined. The analyzer's display was plotted using a 'screen dump' utility.
