Use Scan Engine

Align the aiming beam with the barcodes, and adjust the angle between the beam and the barcodes to get the best results. The recommended range from the mobile computer to the barcodes is 7 to 30cm.

- 1. Select Demos > Scan Demo;
- 2. Touch Scan on the screen or press and hold any Scan button;
- 3. Point the mobile computer at the bar code;
- 4. Adjust the aiming beam: for optimum performance, avoid reflections by scanning the barcode at a slight angle. Scan the barcode to slowly move the aiming beam over the bar code;
- 5. The information is obtained when the barcode is successfully decoded and the mobile computer beeps.

Aiming Beam

The aiming beam gets narrower when the mobile computer gets closer to the barcodes, while it gets wider when the mobile computer gets farther from the barcodes.

The smaller the barcodes, the closer the aiming beams should get to the barcodes
The bigger the barcodes, the father the aiming beams should get to the barcodes

Microwaves
The radio in the ScanPal EDA52 RF terminal operates on the same frequency band as a microwave oven. Therefore, if you use a microwave within range of the RF terminal you may notice performance degradation in your wireless network. However, both your microwave and your wireless network will continue to function.

LED Safety LEDs have been tested and classified as "RISK GROUP 1 (Low Risk)" to the Standard: IEC 62471:2006.

RF Exposure Information (SAR) This mobile phone meets the government's requirements for exposure to radio waves. This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government and Canadian Government.	Informations sur l'exposition RF Ce téléphone mobile respecte les exigences du gouvernement en matière d'exposition aux ondes radio. Ce téléphone est conçu et fabriqué de manière à ne pas dépasser les limites d'émission pour l'exposition à l'énergie de radiofréquence (RF) établies par la

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the government FCC/IC is 1.6 W/kg and for Europe 2 W/kg. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Model EDA52-1
FCC SAR
The highest reported FCC SAR values for head and body-worn accessory use conditions are: **0.70 W/kg (1g)** and **1.43 W/kg (1g)**.

Model EDA52-0 FCC SAR The highest reported FCC SAR values for head and body-worn accessory use conditions are: 0.27 W/kg (1g) and 0.67 W/kg (1g).	DAS FCC Les valeurs DAS FCC les plus élevées pour les conditions d'utilisation des accessoires portés sur la tête et le corps sont les suivantes: 0,27 W/kg (1g) et 0,67 W/kg (1g).

The highest reported IC SAR values for head and body-worn accessory use conditions are: **0.27** W/kg (1g) and **0.67** W/kg (1g).

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR

The highest reported CE SAR value for head and body-worn accessory use conditions are: **0.13 W/kg** (10 g) and **0.20 W/kg** (1g).

Model EDA52-1

CE SAR
The highest reported CE SAR The highest reported FCC SAR values for head, body-worn accessory and simultaneous transmission use conditions are:
0.31 W/kg (1g), 1.63 W/kg (1g), and 1.77 W/kg (1g).

For body-worn operation, this device has been tested and meets the ICNIRP guidelines and the European Standard EN62209-2, for use with dedicated accessories. SAR is measured with this device at a separation of 5mm to the body. While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

 Caution: If a body worn accessory is not purchased from Honeywell, the accessory must contain no metal and provide a 1.5 cm (0.6 in) space between the device and the body. Use of antennas and accessories not authorized may void the compliance of this product and may result in RF exposures beyond the limits established for this equipment.

 Mise en garde : Si un accessoire de corps n'est pas acheté auprès d'Intermec, cet accessoire ne doit contenir aucun métal et garantir un espace de **1.5 cm** entre l'appareil et le corps. L'utilisation d'antennes et d'accessoires non autorisés peut annuler la conformité de cet appareil et peut causer une exposition aux RF au-delà des limites établies pour cet équipement.
