X	1	The form 731 application lists FCC ID:HD5PDT7850 while the label lists FCC ID:HD57850LOE. The users manual also clearly lists two individual labels, one for WLAN FCC ID:HD57850LOE and WLAN+BT FCC ID: HD57850LPE. Please confirm which ID information is correct for this configuration under this application..	Confirmed two FCC ID's will be required. ID's will be: HD57850LPE (WLAN and BT) And HD57850LOE (WLAN only)	Cetecom 10/17/06
X	2	Please confirm whether multiple FCC IDs are required. The present application is only for a single FCC ID.	See above.	Cetecom 10/17/06
X	3	Please confirm that the requested information for temporary confidentiality may be released for public inspection on 11/10/2006	Applicant requested to remove temporary confidentiality request.	Cetecom 10/17/06
X	4	Please provide an updated temporary confidentiality letter incorporating reference to DA04-1705	See above	Cetecom 10/17/06
X	5	Please clarify maximization of portable equipment; in accordance with ANSI C63.4, preliminary testing for portable equipment requires investigation in three orthogonal positions.	Updated test reports provided.	Cetecom 10/30/06
X	6	The test mode used for emissions testing is unclear. The operational description lists the use of 802.11b in the WLAN portion of this equipment, however the schematics make reference to 802.11b and g modes. Please clarify the operating mode tested for compliance and confirm whether 802.11g is employed for use in the equipment.	Typo in schematics	Cetecom 10/17/06
X	7	Please clarify test procedures used for compliance testing. Requirements under FCC part 15.employ the use of ANSI C63.4. Specific measurement procedures for 15.247 are DA00-705 and KDB 558074	Updated test reports provided	Cetecom 10/31/06
Xx	8	Please clarify the test distance for emissions testing	Confirmed 3m test distance.	Cetecom 10/17/06
X	9	Please supply compliance statement for RF Exposure.	Uploaded MPE calculations.	Cetecom 10/30/06
X	10	Test setup photos show AC conducted testing - please confirm that equipment is not capable of operation while in charge mode.	Updated test report provided.	Cetecom 10/31/06
X	3a	CKC CS confirms repeal of temporary confidentiality, this item is to inform the applicant only permanent confidentiality will be applied at the time of filing. No response necessary to this item	Note	N/A
		For Bluetooth portion of equipment:		
X	11	Please confirm compliance with receiver input bandwidth in accordance with 15.247(a)(1)	Information Provided.	Cetecom 10/30/06
X	12	Please provide information regarding 15.247(a) pseudo random hop	Information Provided.	Cetecom 10/30/06

		sequence.		
X	13	Please provide information regarding compliance to 15.247(h) incorporation of intelligence	Information Provided.	Cetecom 10/30/06
		For WLAN portion of equipment		
X	14	Please clarify modes of modulation for 801.11 operation. 801.11b does not normally offer OFDM as listed on page 5 of test report	Updated test report provided.	Cetecom 10/30/06
		RF Exposure		
X	15	An RF exposure statement required to be provided to the FCC as an exhibit. Please provide such a statement for upload. The peak EIRP of this equipment is higher than the low threshold for TCB review. This implies MPE calculations are required; SAR is optional.	RF Exposure information provided.	Cetecom 10/30/06
X	16	Please clarify "Mobile" RF exposure operating conditions. Users manual specifically lists user requirements for body worn configurations. User maintained RF exposure restrictions are not acceptable compliance for portable configurations. If portable configuration is intended, please supply demonstration of compliance for portable configurations. NOTE: As a hand-held only device, the final FCC Grant will have restrictions to Mobile RF exposure conditions.	Updated users manual provided.	Cetecom 10/30/06
