Dear Alan

Original application - TCB - Hand Held Products Inc. HD5950005, HD5950007, HD5950008

Please find enclosed three sets of zipped files on behalf of Hand Held Products.

The applications are for three variants of the Hand Held Products D9500 which is a mobile computer for data collection. Each mobile computer is equipped with a PXA255 400MHz RISC processor built to run the Pocket PC platform. The variants are the D950005, D950007 and D950008.

A previous application was made to BABT as a TCB and granted under the FCC id: HD5950009. Please use the EMC reports supplied with that application to help support these three variant applications. **RF exposure reports will be submitted shortly.** The D950009 contained three radio modules as follows:

GSM module FCC id: QIPMC45

WLAN module FCC id: QPUW_LAN6060EBK

Bluetooth module FCC id: LUBBTM-1

The variants are sub-equipped versions of the HD5950009. The D950005 contains only the GSM module. The D950007 contains the GSM module and the WLAN module. The D950008 contains the GSM module and the Bluetooth module. I have included a document "9500 radio options overview" and the Declarations of Build Status for further information.

The label information is contained in the User Manual supplied with the HD5950009 application.

Confidentiality letters and authorisation letters have been included.

This application is part of a Onestop project. The certification number is **HA611654**. Please do not invoice Hand Held Products directly. The Project Manager is **Russell Bradbeer**. If there are any questions please contact Russell in the first instance. **Hilton Carr** was involved with the original certification.

Yours sincerely

Phil Dolling
Compliance Manager
