

Operational Description

The transmitter of the EUT (WLAN Access Point) is powered by power adapter and POE (Power Over Ethernet) and connected with POE through RJ 45 port. The antenna used in this product is Dipole Antenna with MMCX Connector. Under normal use condition, the user has to keep at least 20cm separation distance between radiator and the body of the user.

The other instruction, please have a look at the users manual.

DSSS Information

This device is Direct Sequence Spread Spectrum, the data is mixed by pseudorandom code which is an orthogonal code. The mixed data is digital modulated by DBPSK and DQPSK technique depends on the data rates.

The CCK coding is applied for increasing the data rate, and also the processing gain will be increased. The bit rates are 1,2,5.5,11Mbps.
