

Attestation letter for U-NII 6 GHz device

Date: July 20, 2026

Federal Communications Commission
Authorization and Evaluation Division
1435 Oakland Mills Road
Columbia, MD 21046

We, Quanta Computer Inc, attest that this device under FCC ID: HFS-QICSFDNX5US complies with device protocol requirements and operational restrictions: for 6VL.

Note for Modules:

- Device protocol attestation and contention-based protocols apply to functions permanently embedded in the module and cannot be host-dependent. Otherwise, the module must be restricted and filed as a Software-Defined Radio or with joint responsibility agreements.
- Device Restriction statements: We, the grantee, will document the physical restrictions associated with the equipment classes for host products (wired power, integral antenna, non-weatherized enclosure) as conditions of use through the host manufacturer's integration instructions.

Very Low Power (6VL):

1. Device Protocol Attestation Statement:
 - a. Statement that this device will prioritize spectrum above 6.105 GHz (provide details on how this is implemented in operational description).
 - b. Statement that this device will use Transmit Power Control (TPC). Provide details on mechanisms that trigger TPC in operational description (for example, environment, performance, bandwidth, etc.).
2. Statement acknowledging device restrictions:
 - a. Operation is prohibited on oil platforms and aircraft, except that operation of this device in 5.925-6.425 GHz is permitted in large aircraft flying above 10,000 feet.
 - b. Control of or communications with unmanned aircraft systems is prohibited, including drones.

Sincerely,

Signature Joyce Kuo
