Dear Bill,

The responses are as below:

1. GPRS will be applied with the entire notebook.
2. ~ 4 : Still push Option thru Acer.
5. We use the peak EIRP in part 24 report directly. That is we use the measured EIRP value, not calculated EIRP value.
6. Will upload POA

Thanks a lot.

BR
Daniel

Regarding www.AmericanTCB.com application:

ATCB ID: ATCB003430

FCC ID: HLZBL503G

IC ID:

NB ID:

Account name: sporton

Daniel,

Just a quick update for this project:

- 1.) The labels for WLAN and BT have been supplied - thanks. As it stands
(1.) the FCC ID: HLZBL503G should apply to the entire notebook computer with built-in GPRS card, yes? Or (2.) is the "bare bones" computer covered by a separate DoC authorization, and we are simply doing an LMA on the GPRS card/notebook PC combination only. If (2.) then a Limited Modular Approval letter (LMA) would need to be presented.
- 2.) Still no schematics.
- 3.) Still no revised parts list (see my note of May 2).
- 4.) Still no tune up procedure.
- 5.) MPE estimation makes no mention of antenna gain, and no calculations are shown.
- 6.) Still no agent authorization letter.

Bill
