Гарантия на изделие

1. Объем Гарантии

1.1 Настоящая гарантия осуществляется компанией **ACER** и определяет права для пользователей оборудования **ACER**. Пожалуйста, внимательно прочитайте данный документ, поскольку в случае предъявления претензии в соответствии с данной Гарантией будет подразумеваться, что Вы поняли и приняли ее условия. Независимо от данной Гарантии Вы можете обладать другими, в том числе более широкими правами и средствами защиты в отношении продавца товара в рамках действующего законодательства РФ. Данная Гарантия не ограничивает таких прав.

1.2 В течение гарантийного срока, указанного в Гарантийной карте, приложенной к Вашей Системе (см. «Гарантийная Карта»), **Acer** гарантирует отсутствие дефектов материалов и/или качества изготовления при нормальном использовании у любого изделия компании **Acer**, включая оригинальные детали и комплектующие **Acer** (предлагаемые в качестве «Опций» и/или «Принадлежностей»), установленные в Вашем изделии компанией **Acer** на момент покупки (далее совместно называемые "Система"), которые предназначены для продажи и были первоначально проданы конечному пользователю на территории России («Территориальная Сфера Действия»). Все дополнительно установленные и/или замененные комплектующие, не согласованные с компанией **ACER**, не покрываются действием данной гарантии и ответственность по гарантии за них несет организация-продавец или третьи лица, по чьей инициативе такие действия производились.

1.3 **Acer** не гарантирует бесперебойной или безошибочной работы любого программного обеспечения, предоставленного вместе с Вашей Системой, так же как и соответствия такого программного обеспечения Вашим требованиям

1.4 В качестве меры предосторожности на случай возможных сбоев, частичной или полной утраты информации, необходимо периодически создавать резервные копии данных, хранящихся устройствах хранения информации. Перед передачей любого устройства для проведения гарантийного обслуживания выполните архивирование данных и удалите любую конфиденциальную, частную или личную информацию. Компания **Acer** не несет ответственности за повреждение или потерю любых программ, данных или съемных носителей информации. Компания **Acer** не несет ответственности за восстановление или переустановку любых программ или данных, за исключением программного обеспечения, устанавливаемого компанией **Acer** при производстве данного продукта. Если предустановленное программное обеспечение было полностью или частично утрачено по вине пользователя и он не в состоянии восстановить его самостоятельно, восстановление этого ПО может быть произведено в авторизованном сервисном центре на платной основе.

1.5 В случае предъявления претензии, согласно условиям данной Гарантии, **Acer** по

1.6 Изложенные выше положения и условия являются полным и исключительным гарантийным соглашением между компанией **Acer** и вами в отношении приобретенного оборудования **Acer**.

2. Исключения и Ограничения

Дополнительная информация

А. Специальные примечания по аккумуляторам

Любое время заряда или работы аккумулятора является приблизительным и соответствует примерным временным рамкам, которые могут изменяться в зависимости от условий работы Покупателя.

Б. Замечания по поводу подключения периферийных устройств.

В целях безопасности и сохранения работоспособности перед подключением любых внешних устройств к компьютеру необходимо выключить и отсоединить от электрической сети как компьютер, так и подключаемое устройство. Исключение может составлять подключение USB или FireWare (IEEE 1394) устройств, не требующих дополнительного питания (флешки, клавиатуры, мыши и т.п.).

В. Гарантийное обслуживание и техническая поддержка

В случае поломки Системы надо обратиться к представителю службы технической поддержки, используя контактную информацию, указанную в Гарантийной карте.

При этом необходимо предоставить следующую информацию:

- информацию с оригинальной Гарантийной карты
- Серийный номер Системы (вписан в Гарантийную карту; также его можно найти на нижней части ноутбука). Серийный номер содержит 22 знака. Данный серийный номер важен для предоставления необходимого обслуживания и ДОЛЖЕН указываться при всех контактах с персоналом компании **ACER**.
- Версию операционной системы, установленной на Системе.
- Подробные сведения о любых изменениях в программном и аппаратном обеспечении, внесенных в Систему.
- Убедиться, что неполадка не вызвана программным или аппаратным обеспечением сторонних производителей.
- Точное описание всех сообщений о сбоях.
- При контакте по телефону поместите Систему перед собой и включите ее (если это возможно).

Представитель Центра обслуживания клиентов окажет услуги и поддержку по диагностике и возможному устранению неисправности по телефону. Если неполадку нельзя устранить в результате телефонной консультации, компания **ACER** отремонтирует Систему согласно уровню его обслуживания.

Перед любым ремонтом Покупателю следует убедиться в следующем.

- Сделана ли резервная копия данных, хранящихся на Системе.

- Все ли компоненты программного обеспечения и оборудования, поставляемые не компанией **ACER**, удалены с Системы.

Компания **ACER** оставляет за собой право взимать оплату за детали и труд специалистов, а также транспортировку в случае, если компания **ACER** не обнаружит брака или неполадок в Системе, если Покупатель не выполнил одно из условий, приведенных в данном разделе, или если брак появился по вине Покупателя (например, вследствие небрежного обращения или ненадлежащего использования).

Г. Ремонт у авторизованного поставщика услуг

Если по мнению представителя Центра обслуживания клиентов для устранения неисправности Системы необходим ремонт у авторизованного поставщика услуг, компания **ACER** отремонтирует или заменит Систему в соответствии с решением представителя Центра обслуживания клиентов ПРИ СЛЕДУЮЩИХ УСЛОВИЯХ:

- У Покупателя имеется в наличии оригинальная Гарантийная карта, полностью и правильно заполненная.

- У Покупателя имеется в наличии оригинал документа, подтверждающего покупку Системы.

- Покупатель соблюдал все процедуры, установленные в данной Гарантии.

- Покупатель удалил все компоненты программного обеспечения и оборудования, поставляемые не компанией **ACER**.

- При наличии пароля на вход в **BIOS** или в систему Покупатель удалил его или сообщил необходимую информацию о паролях специалистам авторизованного поставщика услуг.

Представитель службы технической поддержки проконсультирует Покупателя о том, какие действия необходимо выполнить, чтобы получить обслуживание и поддержку.

Ремонт Системы может потребовать форматирования жесткого диска, что приведет к потере хранящихся на нем данных. Поэтому необходимо соблюдать правила, приведенные в разделе В. выше.

Safety Information

1 Important Safety Precaution

Your Acer Connect Enduro M3 Mobile Wi-Fi device is manufactured to comply with European safety standards. This section outlines the safety precautions associated with using the device. Please read the safety and operation instructions before using your device and other accessories. Keep these instructions safe for future reference.

2 Condition of Use

The device is not water-resistant. Please protect the device from water or moisture and do not touch the device with wet hands. Otherwise short-circuit and malfunction of the product or electric shock may occur.

Keep the device and accessories in a cool, well-ventilated area and away from direct sunlight. Do not place the device in a container with poor heat dissipation. Do not enclose or cover your device with clothes, towels, or other objects.

Put your device in places beyond the reach of children. Do not allow children to use the wireless device without guidance.

Do not use your device at places for medical treatment (in an operating room, intensive care unit, coronary care unit, etc.) where wireless device use is prohibited.

To reduce the risk of accidents, do not use your device while driving.

RF signals may affect the electronic systems of motor vehicles. For more information, consult the vehicle manufacturer.

EE recommends using the charger supplied with your device. The use of another type of charger may result in malfunction and/or danger.

3 Cleaning and Maintenance

Do not attempt to dry your device with an external heat source, such as a microwave oven or hair dryer.

Use a clean, soft, and dry cloth to clean the device and accessories.

4 Disposal Instructions

Do not throw this electronic device into the trash when discarding. To minimize pollution and ensure the utmost protection of the global environment, please recycle. For more information on the Waste from Electrical and Electronics Equipment (WEEE) regulations, visit www.acer-group.com/public/Sustainability

5 Ethernet Cable Line Safety

Disconnect all Ethernet cable lines from the equipment when not in use and/or before servicing.

To avoid the remote risk of electric shock from lightning, do not connect the Ethernet cable line to this equipment during lightning or thunderstorms.

6 Medical Devices

The operation of any radio transmitting equipment, including wireless phones, may interfere with the functionality of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine if they are adequately shielded from external RF energy or if you have any questions. Switch off your device in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF transmissions.

Pacemakers. Pacemaker manufacturers recommend that a minimum separation of 15.3 centimeters (6 inches) be maintained between wireless devices and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research and recommendations of Wireless Technology Research. Persons with pacemakers should do the following:

Always keep the device more than 15.3 centimeters (6 inches) from the pacemaker

Do not carry the device near your pacemaker when the device is switched on. If you suspect interference, switch off your device, and move it.

Hearing aids. Some digital wireless devices may interfere with some hearing aids. If interference occurs, consult your service provider.

7 Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles such as electronic fuel injection systems, electronic antiskid (anti-lock) braking systems, electronic speed control systems, and airbag systems. For more information, check with the manufacturer, or its representative, of your vehicle or any equipment that has been added. Only qualified personnel should service the device, or install the device in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty that may apply to the device. Check regularly that all wireless equipment in your vehicle is mounted and operating properly.

Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or enhancements. For vehicles equipped with an airbag, remember that airbags inflate with great force. Do not place objects, including installed or portable wireless equipment in the area over the airbag or in the airbag deployment area. If in-vehicle wireless equipment is improperly installed, and the airbag inflates, serious injury could result. Using your device while flying in aircraft is prohibited. Switch off your device before boarding an aircraft. The use of wireless devices in an aircraft may be dangerous to the operation of the aircraft, disrupt the wireless telephone network, and may be illegal.

8 Warning

Do not attempt to open the device by yourself. Disassembling may result in damage to the device. Small parts may also present a choking hazard.

When this device is switched on, it should be kept at least 15 cm from any medical device such as a pacemaker, a hearing aid or insulin pump, etc.

Switch this device off when you are near gas or flammable liquids. Strictly obey all signs and instructions posted in any potentially explosive atmosphere.

9 Explosive Device Proximity Warning

Switch off your device when in any area with a potentially explosive atmosphere and obey all signs and instructions. Potentially explosive atmospheres include areas where you would normally be advised to turn off your vehicle's engine. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Switch off the device at refueling points such as near gas pumps at service stations. Observe restrictions on the use of radio equipment in fuel depots, storage, and distribution areas; chemical plants; or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas (such as propane or butane), and areas where the air contains chemicals or particles such as grain, dust, or metal powders. Do not switch the notebook on when wireless phone use is prohibited or when it may cause interference or danger.

Warning: Do not operate a portable transmitter (including this wireless adapter device) near unshielded blasting caps or in an explosive environment unless the transmitter has been modified to qualify for such use.

Warning: The wireless adapter is not designed for use with high-gain directional antennas

10 Wireless adapter regulatory information

Warning: For safety reasons, turn off all wireless or radio transmitting devices when using your device under the following conditions. Remember to follow any special regulations in force in any area, and always switch off your device when its use is prohibited or when it may cause interference or danger. Use the device only in its normal operating positions. This device meets RF exposure guidelines when used normally. To successfully transmit data files or messages, this device requires a good quality connection to the network. In some cases, the transmission of data files or messages may be delayed until such a connection is available. Parts of the device are magnetic. Metallic materials may be attracted to the device, and persons with hearing aids should not hold the device to their ears with the hearing aid. Do not place credit cards or other magnetic storage media near the device, because information stored on them may be erased.

Aircraft

Warning FCC and FAA regulations may prohibit airborne operation of radio-frequency wireless devices (wireless adapters) because their signals could interfere with critical aircraft instruments. Ask the airport staff and cabin crew before turning on your device's wireless adapter whilst board.

The wireless adapter and your health

The wireless adapter, like other radio devices, emits radio frequency electromagnetic energy. The level of energy emitted by the wireless adapter, however, is less than the electromagnetic energy emitted by other wireless devices such as mobile phones. The wireless adapter operates within the guidelines found in radio frequency safety standards and recommendations. These standards and recommendations reflect the consensus of the scientific community and result from deliberations of panels and committees of scientists who continually review and interpret the extensive research literature. In some situations or environments, the use of the wireless adapter may be restricted by the proprietor of the building or responsible representatives of the applicable organization. Examples of such situations may include:

- Using the wireless adapter on board airplanes, or
- Using the wireless adapter in any other environment where the risk of interference with other devices or services is perceived or identified as being harmful.

If you are uncertain of the policy that applies to the use of wireless adapters in a specific organization or environment (an airport, for example), you are encouraged to ask for authorization to use the adapter before you turn it on.

11 EU/UK Regulatory Conformance

List of applicable countries

This product must be used in strict accordance with the regulations and constraints in the country of use. For further information, contact the local office in the country of use. Please see https://europa.eu/european-union/about-eu/countries_en for the latest country list.

Specific absorption rate information

This device meets the EU/UK requirements on the limitation of exposure of the general public to electromagnetic fields by way of health protection. The limits are part of extensive recommendations for the protection of the general public. These recommendations have been developed and checked by independent scientific organizations through regular and thorough evaluations of scientific studies. The unit of measurement for the European Council's /UK recommended limit for mobile devices is the "Specific Absorption Rate" (SAR), the device complies with RF specifications when the device is used at a distance of 5 mm from your body. The SAR limit for mobile devices is 2.0 W/Kg (Body-worn), 4.0 W/Kg (Limbs) and the highest SAR value for this device when tested for use at the body-worn was 1.332W/kg and when tested for use at the limbs was 2.955W/kg. This device was tested for typical body-worn operations with the back of the device kept 0.5cm from the body. It meets the requirements of the International Commission on Non-Ionizing Radiation Protection (ICNIRP). For body-worn operation, this device has been tested and meets the ICNIRP exposure guidelines and the European/UK Standard, for use with dedicated accessories. The use of other accessories which contain metals may not ensure compliance with ICNIRP exposure guidelines.

Hereby, Acer Incorporated, declares that the radio equipment type M3 complies with Directive 2014/53/EU and RER 2017 (SI 2017/1206). The full text of the EU and UK declaration of conformity is available: Please search for Acer Connect M3 Mobile Wi-Fi at www.acer.com

Additional Safety Instructions

1 Safety Instructions

Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage points or other risks. Refer all servicing to qualified service personnel. Unplug this product from the wall outlet and refer servicing to qualified service personnel when:

- The power cord or plug is damaged, cut, or frayed.
- Liquid was spilled into the product.
- The product was exposed to rain or water.
- The product has been dropped or the case has been damaged.
- The product exhibits a distinct change in performance, indicating a need for service.
- The product does not operate normally after following the operating instructions.
- The product exhibits a distinct change in performance, indicating a need for service.
- The product does not operate normally after following the operating instructions.
- When unplugging the power cord, do not pull on the cord itself but pull on the plug.
- This product should be operated from the type of power indicated on the marking label.

2 Battery Information

Batteries may explode if not handled properly. Do not disassemble or dispose of them in the fire. Do not tamper with batteries. Keep them away from children. Follow local regulations when disposing of used batteries. This device uses a Lithium battery. Do not use it in a humid, wet, or corrosive environment. Do not put, store, or leave your product in or near a heat source, in a high-temperature location, in strong direct sunlight, in a microwave oven, or a pressurized container, and do not expose it to temperatures over 60° C (140° F).

Failure to follow these guidelines may cause the battery to leak acid, become hot, explode or ignite and cause injury and/or damage. Do not pierce, open or disassemble the battery. If the battery leaks and you come into contact with the leaked fluids, rinse thoroughly with water and seek medical attention immediately. For safety reasons, and to prolong the lifetime of the battery, charging will not occur at temperatures below 0° C (32° F) or above 45° C (113° F).

The full performance of a new battery is achieved only after two or three complete charge and discharge cycles. The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the operation time becomes noticeably shorter than normal, buy a new battery. Use only the approved batteries, and recharge your battery only with the approved chargers designated for this device. Never use any charger or battery that is damaged.

Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object such as a coin, clip, or pen causes a direct connection between the positive (+) and negative (-) terminals of the battery. (These look like metal strips on the battery.)

Replacing the battery

Improper replacement or mishandling could damage the battery, cause Overheating, result in injury, or cause a risk of fire or explosion. Please check the user manual for the product information

The device with built-in Battery

The built-in battery must be replaced by an authorized service center. Do not attempt to replace or remove the battery by yourself. Note: Please refer to www.ac-er.com for battery shipping documents.

3 USA - FCC and FAA

FCC statements:

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications or changes to this equipment. Such modifications or changes could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types M3(FCC ID: HLZM3) has also been tested against this SAR limit.

For body worn operation, this product has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and positions the

product a minimum of 10 mm from the body. Use of other enhancements may not ensure compliance with FCC RF exposure guidelines.

The device for operation in the band 5150-5250MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

IC statements:

This device complies with Industry Canada license-exempt RSS standard(s).

Operation is subject to the following two conditions:

- (1) this device may not cause interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme avec Industrie Canada RSS exemptes de licence standard(s).

Son fonctionnement est soumis aux deux conditions suivantes:

- (1) cet appareil ne peut pas provoquer d'interférences, et
- (2) cet appareil doit accepter toute interférence, y compris celles pouvant causer un mauvais fonctionnement de l'appareil.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

This device has been tested for compliance with IC SAR values at a typical operating near the body. To ensure that RF exposure levels below the levels tested, use accessories with this equipment to maintain a minimum separation distance of 10 mm between the body of the user and the device. These accessories should not contain metallic components. It is possible that the accessories used close to the body that do not meet these requirements are not consistent with the SAR limits and it is advisable to avoid using them.

Ce dispositif a été testé pour la conformité avec les valeurs SAR à un fonctionnement typique près du corps. Pour assurer que les niveaux d'exposition aux radiofréquences en deçà des niveaux testés, utiliser des accessoires avec cet équipement pour maintenir une distance de séparation minimale de 10 mm entre le corps de l'utilisateur et l'appareil. Ces accessoires ne doivent pas contenir des composants métalliques. Il est possible que les accessoires utilisés près du corps qui ne répondent pas à ces exigences ne sont pas compatibles avec les limites SAR et il est conseillé d'éviter de les utiliser.

The device for operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

5150 à 5250 MHz Pour usage intérieur seulement.

A. - Informations relatives à la sécurité des personnes utilisatrices ou non

Respect des restrictions d'usage spécifiques à certains lieux (hôpitaux, avions, stations-service, établissements scolaires...).

Pour les téléphones mobiles, rappel de l'interdiction de l'usage d'un téléphone tenu en main par le conducteur d'un véhicule en circulation.

Précautions à prendre par les porteurs d'implants électroniques (stimulateurs cardiaques, pompes à insuline, neurostimulateurs...) concernant notamment la distance entre l'équipement radioélectrique et l'implant (15 centimètres dans le cas des sources d'exposition les plus fortes comme les téléphones mobiles).

B. - Informations sur les comportements à adopter pour réduire l'exposition aux rayonnements émis par les équipements radioélectriques

Utiliser l'équipement radioélectrique dans de bonnes conditions de réception pour diminuer la quantité de rayonnements reçus.

Utiliser un kit mains-libres ou un haut-parleur, si adapté à l'équipement radioélectrique.

-Faire un usage raisonné des équipements radioélectriques comme le téléphone mobile, par les enfants et les adolescents, par exemple en évitant les communications nocturnes et en limitant la fréquence et la durée des appels.

-Eloigner les équipements radioélectriques du ventre des femmes enceintes.

-Eloigner les équipements radioélectriques du bas-ventre des adolescents.
