

Ademco Inc.

Statement

We, **Ademco Inc.** requests acceptance of the labeling proposal described below for mobile phone bearing FCC ID: HS9-C7189W00.

The label will be put in battery compartment, so it looks better than stick it on the back of shell.

It's very easy to see the label, as you just need to take off back shell via nail.
Please refer to the picture 1, there is a small gap on the edge of device's back shell.

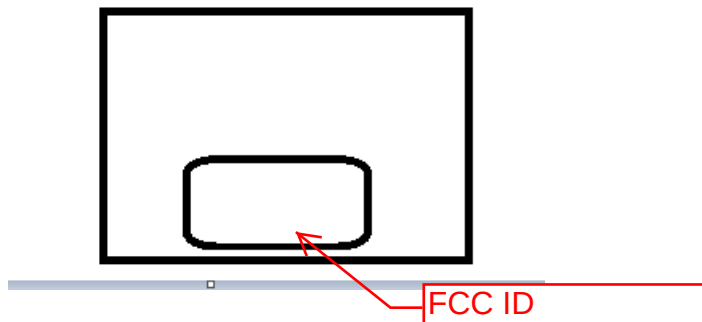

Please notice, the device's back shell is fixed with host via buckle, there is no adhesive used refer to picture 2 .

Take off the shell via nail

So we directly print the FCC ID on the middle side of our battery package (box), so that it is always viewable every time a new device is purchased. Every one could open the shell and take off the battery (right in picture 3) and see the label easily (left in picture 3).

FCC ID

Signature: 

Name/Title: Paul Easting

Company name: Ademco Inc.

Address: 1985 Douglas Drive Golden Valley Minnesota United States
