

Applicant: Resideo USA LLC

FCC ID: HS9-ERM4010R01

2.2 Attestation Statement (Equipment Class DTS and DSS – Bluetooth/WiFi)

This device contains an embedded Frequency Hopping device that is compliant with the applicable FCC Part 15C regulations.

Part 15.247 (a)(1) The hopping sequence must be pseudo random.

- Each frequency must be used equally on average by each transmitter
- The receivers input bandwidth is approximately equal to the transmit bandwidth
- The receiver hops in sequence with the transmitted signal

Part 15.247 (g) The system is designed to comply with all of the regulations in this section when the transmitter is presented with a continuous data stream (or information).

Part 15.247(h) The system does not coordinate its channel selection/hopping sequence with other frequency hopping systems for the express purpose of avoiding the simultaneous occupancy of individual hopping frequencies by multiple transmitters.

Yours sincerely,
