Subject: C2PC re HS9-RTH9580WF01

This is an application for reassessment as a Class II Permissive Change for the certification of FCC ID: HS9-RTH9580WF01 under 47 CFR 15.247. This application is being made because the chip antennas were replaced by PCB antennas along with the RF tuning component values; also an RF switch part number was replaced.

The RTH9580WF01 is a Wi-Fi enabled thermostat operating in the 2.4GHz ISM band utilizing the popular 802.11b/g/n standard data rates and modulations. This thermostat is designed to control various heating-ventilation-air-conditioning (HVAC) equipment. This thermostat is intended to be used in residential and light-commercial applications.
