Application Examiner/Reviewing Engineer

Re: CONFIDENTIALITY REQUEST

Applicant: The Whistler Group

FCC ID: HSXWH22

To whom it may concern:

Pursuant to 47 CFR S 0.457 and S 0.459, The Whistler Group hereby requests to withhold from public review certain portions of the application for equipment certification for the referenced FCC identifiers. It is requested that the following sections of the application be kept confidential:

- Schematics
- Detailed Block Diagrams
- Detail Operational Functional Description

The Whistler Group additionally requests short term confidentiality on all internal images of the above referenced FCC identifiers until July 30, 2016

- Internal images of the microwave front end (pcb contained within the horn casting)

The Whistler Group has invested considerable time and materials in research and development to produce the referenced products. These sections are considered "Confidential" in the business practice, contain trade secrets, or proprietary information, and are not normally disclosed to the public. Disclosure of these sections of this application to competitors might be harmful to the Applicant and would give them significant competitive advantages in developing similar products. It would also disclose successful implementation of unpublished, leading edge technology developed by the applicant.

Sincerely,
Michael Batten
Product Development Engineer
The Whistler Group
