

**Product:** Millimeter Wave Radar Sensor

**Model:** DNMWR013-RAM

**Marking location:**

**Note:**

Marking layout, size and other indications may be changed.

Heat release fins Method of labeling: print on a laminated PET film and attach it by wrapping around the cable.

Durability tests have confirmed that the label will not disappear within the product life.

\*Heat release fins are made on the back side, and there is no flat surface to attach labels.

Regarding the FCC 15.19(a) statement:

Due to the following reasons:

- the product has heat release fins structure
- there are constraints related to the RF radiating surface
- there are installation requirements for integration into a vehicle

there is no location on the product where the required statement can be permanently affixed in a font size of four points or larger.

In addition, this product is not equipped with a display and therefore does not support electronic labeling (e-label).

Accordingly, the FCC 15.19(a) statement is provided in the user manual.
