Feed Button Modes	48

Introduction

This section describes what you get in your shipping box and provides an overview of printer parts. This section also has procedures that describe how to open and close the printer and report any problems.

Hello!

Thank you for choosing the Zebra® R402™ Printer, a high-quality thermal demand printer with RFID capability manufactured by the industry leader in quality, service, and value—Zebra Technologies Corporation. For over 25 years, Zebra Technologies Corporation has provided customers with the highest caliber of products and support.

This manual provides all of the information you will need to operate your printer on a daily basis. RFID specific ZPL II commands are contained in this manual. To create label formats, refer to the ZPL II Programming Guide (part # 46530L). This guide is available by contacting your distributor or Zebra Technologies Corporation.

NOTE: Many printer settings may also be controlled by your printer's driver or label preparation software. Refer to the driver or software documentation for more information.

The Zebra R402 printer, when connected to a host computer, functions as a complete system for printing and encoding “Smart” labels, tickets, and tags. The printer receives instructions from the host computer. Microprocessors continuously monitor these signals along with the inputs received from the control panel and various sensors. The microprocessors interpret this information and control the Zebra R402 printer's mechanical drive, print Head, RFID Subsystem communications, command interpretation, label formatting, and media and ribbon movement.

What's in the Box?

Save the carton and all packing materials in case you need to ship or store the printer later. After unpacking, make sure you have all parts. Follow the procedures for inspecting the printer to familiarize yourself with printer parts so you can follow the instructions in this book.

and Cord

Inspecting the Printer

Look at the outside of the printer and make sure that all parts are present.

Opening the printer

To access the media compartment, you must open the printer.

Pull the release levers towards you and lift the cover.

INSPECTING THE PRINTER (continued)

After opening the printer, check the media compartment.
