Zigbee Hub

Easy Start Guide

Micro USB Cable

Warranty Card

PRODUCT DESCRIPTION

The Zigbee Hub works as a communication bridge between WiFi and Zigbee in the IoT ecosystem. It allows smart devices to communicate with each other for a seamless control from the app on the phone.

IMPORTANT SAFETY INFORMATION

- Not for humid places such as bathroom and green house.
- Keep the product from devices with strong interference signal such as microwave oven and TV sets.

WHAT YOU'LL NEED

- iOS or Android smart device:
 - iOS 11 or later
 - Android 4.4 or later
- Working router with Wi-Fi network connection

OPERATION GUIDE

1. Plug in the micro USB cable to the micro USB port and power adapter.
2. Power on the device by switching on the power supply.

3. Download the Aztech KylaS App from Google Play/App Store.

4. Login to the Aztech KylaS, and add "Zigbee Hub" to the device list by following the setup guide on the app.
5. When prompted, scan the QR code on the device or packaging box.
6. Connect other products with the Zigbee Hub for seamlessly connected smart home experience.

RESETTING THE ZIGBEE HUB

Press and hold the button for more than 5 seconds. The LEDs will turn off when you release the button, which means the device has cleared the current network and is ready to connect to a new network.

LED STATUS

LED 1

COLOUR	STATUS	REMARK
Green	On	Power On
	Blinking (0.2s on, 0.2s off)	Resetting and Connecting to WiFi Network
Red	On	Not Connected to WiFi Network
Green & Red	Off	Power Off

LED 2

COLOUR	STATUS	REMARK
Green	Blink once	Receiving a Command Package from cloud
	Blinking (0.2s on, 0.2s off)	Zigbee Network Open (Zigbee Device is allowed to join)
Red	On	Receiving a Data Package from Zigbee Device
Green & Red	Off	Zigbee Network Close (reject device from joining, normal working mode)

ZIGBEE HUB

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference.
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

In order to comply with RF exposure requirements, a minimum separation distance of 20 cm must be maintained between the user's body and the smart signal converter (including the antenna).
