

● THERMAL AGING

Standing test in the atmosphere

● MOISTURE RESISTANCE

Standing test in the atmosphere of 50°C and relative humidity of 90 %

● WATER RESISTANCE

standing test in water at 40°C

● OIL RESISTANCE

Standing test in machine oil at 40°C

● WEATHERING

Industrial Adhesive Tape T4000

WORKABILITY

Low-temperature adhesion

T4000 provides high adhesion even in the bonding work at low temperatures.

CAUTION: While this report is based on our company's reliable testing, this does not imply that the effects noted herein are guaranteed. The user is requested to use this product at his own risk after thorough study of the purposes for which the product is designed and the conditions under which it is used.

SUMITOMO ELECTRIC FINE POLYMER, INC.

910, Oaza Noda, Kumatori-cho, Sennan-gun, Osaka, 590-0451 JAPAN

Date : Dec. 24, 1999

No. : RE4-0180C

Client : SUMIPAC CORPORATION

SPECIFICATION

FOR

SUMITUBE A

Authorized by

J. Kishimoto

Senior Engineer,

Irradiated Products Group

Engineering Department

Prepared by

C. Sasaki

Engineer,

Irradiated Products Group

Engineering Department

SA規格書 2/5

RE4-0180C

SUMITUBE A SPECIFICATION1. Scope

This specification covers SUMITUBE A.

2. Feature

This product is irradiated cross-linked, thermally-stabilized, flexible polyolefin heat-shrinkable tubing.

3. Colors

Black, Brown, Red, Orange, Yellow, Green, Blue, Gray, White and Clear
Colors conform to SUMITOMO's standard.

4. Sizes

Sizes are specified in Table 1.

5. Properties

Properties are specified in Table 2.

6. Test method6-1. Inside diameter

Inside diameter shall be measured by using a gage rod or a taper gage.

In case of using a gage rod---- Read the value of the maximum gage rod which passes freely into the tubing without expanding the wall of tubing.

In case of using a taper gage-- Read the value on the gage when tubing isn't expanded by insertion and there is no visible space between the end of tubing and the taper gage.

6-2. Wall thickness

Wall thickness shall be measured by a pin-dial gage or a micrometer at several points.

6-3. Shrinkable condition

Tubing shall be fully recovered at 125°C for 1 minute in an oil bath.

SA 規格書 3/5

RE4-0180C

6-4. Longitudinal change

Tubing shall be cut into about 100 mm lengths and measured.
After full recovery, the length shall be remeasured and the
longitudinal change shall be calculated from the following formula:

$$\text{Longitudinal change(\%)} = \frac{\text{Length after full recovery} - \text{Initial length}}{\text{Initial length}} \times 100$$

6-5. Properties

Test methods conform to JIS-C-2133.

RE4-0180C

Table 1. Sizes

Volume resistivity	Ω·cm	10 ¹⁴ , MIN.
Tensile strength	MPa(kg/mf)	10.8(1.05) , MIN.
Ultimate elongation	%	200 , MIN.

VHB™ Double Coated Acrylic Foam Tapes and Adhesive Transfer Tapes

Technical Data

August, 1994

Supersedes December, 1991

Adhesive Description 3M VHB™ (Very High Bond) Tapes utilize high performance adhesives which have excellent long-term holding power. The peel adhesion and tensile holding power of tapes in the VHB family are significantly higher than typical pressure sensitive tapes.

Product Description VHB Tapes are ideal for use in many interior and exterior industrial applications. In many situations they can replace rivets, spot welds, liquid adhesives, and other permanent fasteners.

Each tape in the VHB family has specific features. These can include high tensile, shear and peel adhesion, resistance to solvents, moisture and plasticizer migration, U.L. recognition, low outgassing, film liners, conformability and adhesive which can be applied at temperatures as low as 32°F (0°C).

VHB Tapes are ideal for bonding a variety of substrates, including most metal, sealed wood and glass, as well as many plastics, composites and painted surfaces.

Note: All VHB Tapes should be thoroughly evaluated by the user under actual conditions with intended substrates to determine whether a specific VHB tape is fit for a particular purpose and suitable for user's method of application, especially if expected use involves extreme environmental conditions.
