To Whom It May Concern

OMNEX CONTROL SYSTEMS INC. requests that its schematics not be viewable. OMNEX is using proprietary techniques for its radios and has built a reputation in its market for reliable and robust radio systems. OMNEX has invested in the development and marketing of the technology and we feel it is unfair for our competitors to have free access to it.

Sincerely,

A handwritten signature in dark ink, appearing to read 'LD', is written over a light blue horizontal line.

Len Dueckman
Vice President
