Dear Helen,

- #1 Please refer to revised test report. The 6dB bandwidth has been retested.
- #2 Please find attached revised user manual.
- #3 Please find revised FCC label format.
- #4 Please refer to attached antenna gain information.

Best regards,

S. S. Liou
Engineer / EMC Dept. II
Electronics Testing Center, Taiwan

Subject: Bright Headphone Electronics Co., FCC ID: IERRF-T16, Assessment NO.: AN04T4331, Notice#1

Question #1: This device was tested based on 15.247 Digital modulation device requirements. The test data of 6dB bandwidth shows the device failed to meet minimum of 500KHz requirement. Please address this noncompliance issue.

Question #2: The Specifications on the user manual said the power requirement is 3V (1.5v(AAA) x 2), the "Precaution" on the manual said "Operating the transmitter on 12V power supply only". The test report said the transmitter was powered by PC only. Please address this inconsistent issue.

Question #3: This device is also classified as PC and PC peripheral. FCC15B portion is subject to either DoC or certification. If it is through DoC

scheme, please add FCC DoC on the FCC ID label format. Otherwise, please file as composite device.

Question #4: Please provide antenna information including antenna gain.

Best regards,
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
