

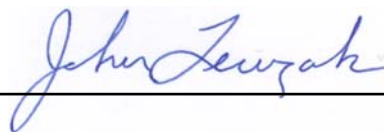

Exhibit 2A. Statements of Certification -- Pursuant to 47 CFR 2.907

2.1. Continued Applicability of Application SAR, EMC, and related Information following the Supersession of SAR Report Exhibit.

I hereby certify that, apart from the one SAR test case addressed in the amended RF Exposure test report (CDMA 1900 wireless hotspot operation), all information and test data originally filed as part of the IHDP56MD1 application are unaffected, and remain in effect. Specifically, no hardware changes are made, neither are there changes to maximum rated power or other EMC parameters. All other RF Exposure test case data continue to apply to this application.
