

- » **Check out Pay Attention recordings:** Pay Attention recordings are saved as notes with AI-generated titles. To check out the summary or transcriptions, tap an audio note. The summary appears at the top of the screen, and audio transcriptions for each speaker appear separately. To turn off speaker recognition, go to **Home**, **Notes** or **Collection**, tap Menu ⋮ > **Settings**, and then tap the switch next to **Speaker recognition** to turn it off.
- » **Set the background:** Create or open a note, then tap Menu ⋮ > **Set background** > select a color or pattern > **Set**.
- » **Add to a collection:** Create or open a note, then tap Menu ⋮ > **Add to collection**, select or create a new collection, then tap **Done**. To add multiple notes to a collection, go to **Home** or **Notes**, or open a collection, touch and hold the notes you want to select, and then tap .
- » **Switch to grid or list view:** Go to **Home**, **Notes** or **Collections**, and then tap Menu ⋮ > **Grid view** or **List view**.
- » **Search the notes:** Go to **Home** or **Notes** and tap .
- » **Delete a note:** To delete a note while it is open, tap Menu ⋮ > **Delete**. To delete multiple notes, go to **Home** or **Notes**, or open a collection, touch and hold the notes you want to select, and then tap > **Delete**.
- » **Auto sync:** To auto sync all entries to Google Drive, make sure you are signed into your Google account, and then tap Menu ⋮ > **Settings** and tap the switch next to **Auto sync** to turn it on.

Create and manage collections

- » **Create a collection:** Tap > **Collection**, enter the collection name, and then tap to create a collection.
- » **Find notes in the collections:** Go to **Home** or **Collections** and tap .
- » **Switch to grid or list view:** Go to **Collections**, then tap Menu ⋮ > **Grid view** or **List view**.

Family Space

Create a protected space on your device where children or others can only access the apps they need to use.

Find it: Swipe up from the home screen and tap the **Moto** folder >  **Family Space**

Family

Create a safe digital environment for your family.

Find it: Swipe up from the home screen and tap the **Moto** folder >  **Family Space** >  **Family**

To create Family Space account:

- 1 Open  **Family Space** and tap **Create Family**.
- 2 Add your photo and account information, then tap **Create account**.
- 3 Follow the on-screen instructions to verify your account.

Note: You may need to sign in your moto account to create Family Space

account.

After the account is created, you are the account administrator of the Family Space. You can then link up to 5 family members' devices to share locations and manage how family members use their devices. For detailed instructions, tap menu  > **Help & Support** > **Link family devices**.

Space

Create a protected space on your device where children or others can only access the apps they need to use.

Find it: Swipe up from the home screen and tap the **Moto** folder >  **Family Space** >  **Spaces**

⋮ — Tap to get Help, Feedback, and more.

Your spaces

Dany's space

→ Start

Gabriel's space

→ Start

Carol's space

→ Start

+ Create Space

— Create a space.

- » **Create a space:** Tap **+ Create Space**, then enter the name of your space and select the allowed apps. Tap **Next**. Then tap ▼ next to **Homescreen grid** or **Background** to set the look of your screen when the space is active. Tap **Next**.

Then tap the checkbox next to **Password** to require a password to close the space and tap the checkbox next to **Timer** to show a floating screen on the space, then tap **Done**.

- » **Rename, edit, or delete spaces:** Tap Menu ⋮ > **Rename**, **Edit** or **Delete**.
- » **Launch a space:** Tap **Start** next to the space you want to launch.

Tip: Spaces can also be launched from [Quick Settings](#).

- » **Set space permissions:** When a space is launched, permissions are set. Tap **Device Administrator** to activate the screen lock when the timer runs out, tap **Do Not Disturb** to hide notifications from other apps in active spaces and tap **Notifications** to allow Family Space notifications such as timer alerts in active spaces, then tap **Done**.

- » **Set screen time:** When a space is launched you can set the screen time, tap **15 min**, **30 min**, **1 hr**, **2 hr**, **Custom** or **No time limit**, then tap **Start**. When the time runs out, tap **Add time** to continue, or tap **Leave Space** to exit.

Tip: Tap  to pause the timer.

- » **Close a space:** Tap  to close a space. You may need to enter your password. You can also close a space through the notification curtain or by tapping the Family Space quick tile.

Moto Unplugged

Stay focused by creating a space on your phone to limit apps and interruptions. Start a session any time you want to disconnect from digital distractions.

Find it: Swipe up from the home screen and tap the **Moto** folder >

 **Moto Unplugged**

Or swipe down twice from the top or swipe down from the top right side of your screen to open [Quick Settings](#), then touch and hold  **Moto Unplugged** or .

Note: You may need to swipe left on the panel to find the **Moto Unplugged** tile.

The first time you use Moto Unplugged, you will need to get permissions. To get permissions, open the app and tap **Start**, then do the following:

- 1 Tap **Notifications**, choose **Allow** from the pop-up window.
- 2 Tap **Do Not Disturb**, select **Moto Unplugged**, and then turn on the switch next to **Allow Do Not Disturb**, and tap **Allow**.
- 3 Go back and tap **Continue**.

Customizing your Moto Unplugged session

Tap  **Customize** to customize your Moto Unplugged session.

> Tap to choose what apps are available during your Moto Unplugged session.

> Tap to choose a home screen layout.

> Tap to choose a wallpaper.

> Tap to set what can interrupt your Moto Unplugged session, such as calls and messages.

☒ Enter a password before ending a session.

- » **Allowed apps:** Choose what apps are available during your Moto Unplugged session, such as **Camera**, **Messages**, and **Phone**, then tap **Save**.
- » **App Layout:** Set the app layout of your Moto Unplugged screen. Select a layout, then tap **Save**.
- » **Wallpaper:** Tap the thumbnail of a wallpaper to select it, then tap **Save**.
- » **Interruptions:** Set messages, calls, notifications, alarms, and calendar events that are allowed to show on your phone during a Moto Unplugged session.
 - **Calls:** Tap > to select a group from **Starred contacts**, **Contacts**, **Anyone** and **None**. You will see calls on your phone. Choose **None** if you do not want any calls to interrupt. Tap the switch next to **Allow repeat callers** if you hope to receive a second call from the same person within 15 minutes.
 - **Messages:** Tap > to select a group from **Starred contacts**, **Contacts**, **Anyone** and **None**. When a message is sent from the allowed group, you will receive a notification. No notifications will appear if you choose **None**.
 - **Notifications:** Tap > to set options for notifications during an Unplugged session. To show a notification dot on allowed apps, tap the switch next to **Notification dots** to turn it on. To show notifications in pull down curtain, tap the switch next to **Pull down shade** to turn it on.
 - **Alarms:** Turn the switch on to enable alarms.
 - **Calendars:** Turn the switch on to allow notifications from the **Calendar**.

- » **Require password:** To end a session, you will need to enter a password. To set up a password, see [Screen lock](#).

Starting and ending a Moto Unplugged session

To start a Moto Unplugged session, tap **Start**, on the pop-up window, select the session time you want to last, then tap **Start**. Now you can enjoy a session being focused without many digital interruptions.

To end the Moto Unplugged session, tap  **End**.

More apps

Gmail

Send and receive email from all of your personal accounts (even if they're not Gmail accounts). You can manage your accounts in Gmail and easily switch between them.

Find it: Swipe up from the home screen and tap the **Google** folder >

Tip: If you don't see the  Chat or  Spaces tab, tap Menu  > **Settings**, then tap your account and check the box next to **Chat**.

- » **Add Gmail accounts:** The first time you turned on your phone, you probably set up or logged in to your Google account—that sets up the  **Gmail** app for one account. To add more Google accounts, swipe up from the home screen and tap  **Settings** > **Passwords, passkeys & accounts**, then tap  **Add account** > **Google**.

Tip: In the  **Gmail** app, tap Menu  > **Settings** > **Add account**.

- » **Chat:** Use Google Chat in the **Gmail** app to communicate directly with people.
 - **Chat with a friend:** Start a conversation with a contact. Tap , and then tap an existing contact in the list. Or tap  > , type a name or email address in the search field, and then select a contact suggestion below the search field.
 - **Chat with a group:** Start a group chat to talk to several people at once. Tap , and then tap an existing group in the list. Or tap  > , type a name or email address in the search field, select a contact suggestion below the search field, and then tap  to add more contacts.
- » **Create spaces:** Use a space to communicate with a friend, a group of people or an organization about a topic, project, or shared interest. Tap  >  > **Create a space**.
- » **Start or join a meeting:** Tap , then tap **New meeting** or **Join with a code**.
- » **Add email accounts:** The Gmail app manages all of your email accounts. To add other personal email accounts to the Gmail app, swipe up from the home screen and tap  **Settings** > **Passwords, passkeys & accounts** >  **Add account**. For Microsoft® Exchange server work email accounts, tap  **Add account** > **Exchange**, and enter details from your IT administrator.
- » **Change account settings:** To change the settings for a Gmail or email account, swipe up from the home screen and tap the **Google** folder >  **Gmail** >  > **Settings**, then tap the account name.
- » **Delete accounts:** Swipe up from the home screen and tap  **Settings** > **Passwords, passkeys & accounts**, then tap the account name and **Remove account**.

Tip: To learn more about **Gmail**, visit <https://support.google.com/mail>.

Meet

Sign in with your Google account for video calls and meetings.

Find it: Swipe up from the home screen and tap the **Google** folder >

Add or manage your Google account.
Change settings.

Tap a contact to call or send a message.

Start a new call.

- » **Start a new call:** Tap the search box, then type or tap a name in your contacts to start a voice call, video call or send a message.
- » **Create a new meeting:** Tap > **Create link**. To share the meeting link, tap Copy . Or you can tap **Share** to share it via email or message. To join the meeting, tap **Join**.
- » **Schedule a meeting:** Tap > **Schedule**, then set your schedule details and tap **Save**.
Tip: After saving the schedule, the **Calendar** app creates an event. You can edit the title, time, guest list, and more.
- » **Start a group call:** Tap > **Group call**, then search for contacts or dial.
- » **Preview incoming calls:** See live video of the caller before you answer. To turn this off for both the caller and receiver, tap Menu > **Settings** > **Calling (legacy)** > **In-call settings** > **Knock Knock for this device**, and turn it on.
- » **Change settings:** Tap Menu > **Settings** to change the notifications, blocked users, message settings, and more.
- » **Call anyone:** Meet works across platforms, allowing you to call friends with Google Meet app on any device.
Tip: When on a video call, your phone will automatically switch from cellular network to Wi-Fi, if available.

Calendar

See all your events, all in one place.

Find it: Swipe up from the home screen and tap the **Google** folder >

See your tasks.

Go to today's date.

Search for a task or event.

Tap to see the whole month.

Swipe to go to a different month.

Change the calendar view, adjust settings, get help, and more.

Add a new task or event.

» **Change the view:** Tap the month at the top to choose a date to view. Or tap  to choose **Schedule**, **Day**, **3 days**, **Week**, or **Month**.

» **Go to today's date:** Tap  at the top.

» **Add tasks or events:** Tap  > **Birthday**, **Task** or **Event**, enter details, then tap **Save**.

Tip: In most views, tap a time on the calendar to enter event details.

» **Find an event:** Tap  to search for a task or event.

» **Show, edit, or delete tasks or events:** Tap a task or event to open it, then tap  to edit it, or tap **Menu**  > **Delete** to remove it.

» **Show, hide, or add calendars:** Tap , and select which options, such as events, tasks, birthdays, holidays or other calendars, to show or hide. You can use a computer to add or remove calendars on your Google account at www.google.com/calendar.

Tip: Add a **Calendar** widget to your home screen. Touch and hold an empty spot on the home screen, tap **Widgets**, then touch and hold a calendar widget and drag it to your home screen.

Contacts

Combine information from your Google contacts and social networks for quick access to everyone you know.

Tip: You can find most of these features on the  **Contacts** tab in the Phone app. See [Phone](#).

Find it: Swipe up from the home screen and tap  **Contacts**

Manage accounts.

Tap to view contact information, call, send a text message, and more.

Add a contact.

- » **Add a contact:** Tap .
- » **Edit or delete:** Tap a contact, then tap **Delete**.
- » **Call, text, or email:** Tap a contact, then tap an option. (If the contact doesn't have an email address, you can add one, and use [Meet](#) to video chat.)
- » **Search contacts:** In the **Contacts** list, tap **Search contacts**.
- » **Share a contact:** Tap a contact, then tap **Share contact** to send it in a message or email, via a Bluetooth connection, or save to Google Drive™.
- Tip:** Tap a contact, then tap **Add to Home screen** to add a shortcut for the contact on your home screen.
- » **Synchronize:** On your phone, swipe up from the home screen and tap  **Settings** > **Passwords, passkeys & accounts**, and choose your Google account. Then tap **Account sync** > Menu  > **Sync now**.
- » **Add your details:** To store your user profile, tap your profile picture, then tap **Contacts settings** > **Your info**.

Favorites

Set your most-used contacts as favorites, so you can get to them faster.

- » To set a favorite, swipe up from the home screen and tap , select a contact and tap .
- » To see your favorites, tap  **Phone** >  **Favorites**.

Get contacts

Get all your contacts in one place.

- » To add your social networking contacts, swipe up from the home screen and tap  **Settings** > **Passwords, passkeys & accounts**, then tap **Add account**.
- » To add your email contacts, see [Gmail](#).
- Tip:** If you add an **Exchange** account, you can send messages to your coworkers, even if you don't have them stored in your contacts.
- » To import contacts from your SIM card (if it didn't happen automatically), swipe up from the home screen and tap  **Contacts** > **Organize** > **Manage SIM**. Tap **Import** to confirm.
- » To import contacts from your computer, upload the contacts to your Google account at <http://contacts.google.com>. On your phone, swipe up from the home screen and tap  **Contacts** > **Organize** >  **Settings** > **Accounts**, and tap the switch next to **Automatically sync app data**. You can also see these contacts at <http://mail.google.com>.

Maps

Find a nearby cafe, get directions or step-by-step GPS voice navigation using Google Maps™.

Find it: Swipe up from the home screen and tap the **Google** folder >  **Maps**

Enter what you want to find in the search bar, or tap  to search by voice.

Note: Your screen may look different.

LabEntry_03Nov2025

Search by voice for an address or location.

See your saved places and places you have visited.

See your current location.

Get directions and navigation instructions.

- Contribute

- » **Find an address:** In the search field, type an address or something you're looking for, like "restaurant." Tap an item to see more, or tap an option, such as **Directions** or **Share**, to do more with this item.
- » **Get directions:** Tap , then enter a place or address.
- » **Zoom:** To zoom in or out, drag two fingers together or apart on the screen.
- » **Turn:** Rotate two fingers on the map to turn it.
- » **Tilt:** Drag two fingers up or down on the map to tilt it.
- » **Identify address:** Touch and hold a spot on the map to show the nearest address.
- » **Get map help:** Tap your profile picture, then tap **Help & feedback**.

Note: For more on maps, visit support.google.com/maps.

Google Play

Google Play is a digital content experience from Google where you can find and enjoy your favorite music, movies, TV shows, books, magazines, and Android apps and games.

- » **Download apps:** Tap  **Play Store**.
- » **Log in or open a Google account:** Visit www.google.com/accounts.
- » **Google help:** See www.google.com/support.

Google Home

Control your home devices in one place.

Find it: Swipe up from the home screen and tap the **Google** folder >

Follow the prompts to get started.

Note: You may need to download Google Home.

Google Fit

Get personalized fitness coaching right from your phone.

Find it: Swipe up from the home screen and tap the **Google** folder >

To learn more and to find out which apps work with **Google Fit**, visit www.google.com/fit.

Note: You may need to download Google Fit.

Drive

Keep all your photos, videos, documents, and more safely in one place—private unless you choose to share. Available on Google Drive™ from all your devices.

Find it: Swipe up from the home screen and tap the **Google** folder >

- » To create a new file or folder, tap **+**.
- » To open a file, tap it.
- » To edit a document, tap anywhere in the text to begin typing.

Note: You may need to download **Google Sheets**, **Google Docs**, or **Google Slides** to edit a document.

Music, movies, TV & YouTube

Enjoy quality entertainment experiences right at your fingertips.

YT Music

Music everywhere—stream it, buy it, save it, play it. Listen and create playlists anytime.

Find it: Swipe up from the home screen and tap the **Google** folder >

To upload your music library to YT Music, from a computer, visit music.youtube.com.

Tip: Share songs directly with your contacts. Tap Menu next to a song

and tap **Share**.

For more on the YT Music app, see support.google.com/youtubemusic.

Note: Copyright—do you have the right? Always follow the rules. See “Content copyright” in the legal and safety information on your phone. Connect your phone to the internet, swipe up from the home screen and tap  **Settings** > **About phone** > **Legal information** > **Legal and safety**, then tap **Content copyright**.

Swipe up from the home screen and tap the **Moto** folder > **Google TV**
Find and watch content from your favorite apps:

Find it: Swipe up from the home screen and tap the **Google** folder >

Select the apps and services for your existing subscriptions, then browse shows and movies to start watching.

Note: You may need to download Google TV.

YouTube™

Watch videos and podcasts from YouTube users everywhere—or log in to your account to share your own.

Find it: Swipe up from the home screen and tap the **Google** folder >

Recorder

Create, play, edit, and share your audio notes. You can enable auto-transcription, create a recording, and then tap **Transcription** or **Summary** to view the AI generated content.

Find it: Swipe up from the home screen and tap  **Recorder**

You can also use the recorder on the external display.

Note: Check local laws as you may need permission to record conversations.

Clock

Find it: Swipe up from the home screen and tap  **Clock**

Options

Alarm

Tap . Tap an alarm to edit it, or tap  to add a new alarm.

Tip: Press the volume buttons and tap  >  to adjust Alarm volume.

Wake up to your favorite song by linking to a music app. Or tap **Google Assistant Routine** to have the Google Assistant provide information to start your day, such as the weather, traffic, or what's on your calendar.

When an alarm sounds, tap **Stop**, or **Snooze** for ten minutes. When an alarm sounds with your phone locked, swipe  right to **Stop**, swipe left to **Snooze** for ten minutes.

Clock

To change your alarm volume, snooze delay, or other settings, tap Menu  > **Settings**. For other time zones, tap **Home time zone**.

Timer

For a timer, tap .

Tip:

Connect with Wi-Fi

Turn on and connect to networks

Find it: Swipe up from the home screen and tap  **Settings** > **Network & internet** > **Wi-Fi**, then tap the switch to turn it on

Tip: You can also turn Wi-Fi on and off in [Quick Settings](#).

Tap a found network to connect to it. If required, enter the password. When connected, you'll see  in the status bar.

Note: When Wi-Fi is on, your phone automatically reconnects to available networks it has used before. If you see a question mark in the Wi-Fi status indicator , swipe the status bar down, tap the network, and enter the network's password.

Wi-Fi calling

Note: Not all carriers support Wi-Fi calling. Your carrier may charge to use this feature.

When Wi-Fi calling is on, your phone can route calls over Wi-Fi or your service provider network, depending on your preference and which signal is stronger.

Find it: Swipe up from the home screen and tap  **Settings** > **Network & internet** > **SIMs & mobile network** > **Wi-Fi calling**

Wi-Fi hotspot

You can make your phone a Wi-Fi hotspot to provide portable, convenient Internet access to other Wi-Fi enabled devices. Your phone turns off Wi-Fi and uses the mobile network for Internet access. This feature may require an additional subscription service from your service provider.

Find it: Swipe up from the home screen and tap  **Settings** > **Network & internet** > **Hotspot & tethering** > **Wi-Fi hotspot**

Note: These steps may vary depending on your network.

To set up security:

- » **Hotspot name:** Enter a unique name for your hotspot.
- » **Security:** Select the type of security you want: **WPA3-Personal**, **WPA2/WPA3-Personal**, **WPA2-Personal** or **None**. If prompted, enter a unique password (8 characters min.) that others will need to access your Wi-Fi hotspot.
- » **Hotspot password:** Set or change your hotspot password.
- » **Speed & compatibility:** Choose a frequency for your hotspot. The frequency affects the connection speed and what types of devices can find your hotspot.

Note: If your preferred frequency isn't available, your hotspot may use a different one. Hotspot security settings may change when you change the frequency.

- » **Hide my device:** Hide your hotspot from other devices.
- » **Timeout setting:** Specify when to turn off the hotspot automatically.
- » **Manage devices:** To set which devices can connect to the hotspot, tap **Manage allowed devices**. To restrict the number of devices that can connect to the hotspot, tap **Device limit**, then adjust the number.
- » **Instant hotspot:** Create device groups and allow other devices that are signed in to your Google account to find and share with you. Tap the switch next to **Use cross-device services** to turn it on. You will be able to move video calls, or automatically share Wi-Fi or hotspot without having to enter the password again.

Note: Your phone may not have all features.

Protect privacy from public networks

It is important to keep your activities and information anonymous when connecting to a public Wi-Fi network.

You can use a randomized MAC address to protect your privacy. Swipe up from the home screen and tap  **Settings** > **Network & internet** > **Wi-Fi**, then tap  next to the network you have connected to, and tap **Privacy** > **Use randomized MAC**. To stop sharing your device's name with the network, tap the switch next to **Send device name** to turn it off.

Mobile network

Your phone uses your Wi-Fi network to access the Internet. When a Wi-Fi network is not available, you can use your mobile phone network.

Mobile data is on by default. To turn it off, open [Quick Settings](#) and tap  **Mobile data** or .

To see network settings options, swipe up from the home screen and tap  **Settings** > **Network & internet** > **SIMs & mobile network**.

Note: You should not need to change any network settings. Contact your service provider for help.

Connect through Bluetooth

Turn on and connect devices

Find it: Swipe up from the home screen and tap  **Settings** > **Connected devices** > **Pair new device**

You can also open Bluetooth settings by touching and holding  **Bluetooth** or  in [Quick Settings](#).

Note: If Bluetooth is not on, it will turn on to pair a new or previously

connected device.

- 1 Make sure the device you are pairing with is in discoverable mode (for details, refer to the guide that came with the device).
- 2 Swipe up from the home screen and tap  **Settings** > **Connected devices** > **Pair new device**.
- 3 Tap a found device to connect it. Tap  and choose what the device will be used for. You can tap  next to a saved device and tap  to rename the device.

Tip: To automatically disconnect or reconnect a device, just turn the connected device off or on.

Note: Using a mobile device or accessory while driving may cause distraction and may be illegal. Always obey the laws and drive safely.

Share files using Bluetooth

- » **Photos or videos:** Open the photo or video, then tap  > **Bluetooth**.
- » **Contacts:** Swipe up from the home screen and tap  **Contacts**. Touch and hold a contact, then tap  > **Bluetooth**.

Bluetooth tethering

To share your phone's internet connection via Bluetooth, swipe up from the home screen and tap  **Settings** > **Network & internet** > **Hotspot & tethering** > **Bluetooth tethering**.

Connect with Smart Connect

Seamlessly connect your phone with your PC, Android tablet, monitor, TV, or wearables via **Smart Connect**.

Find it: Swipe up from the home screen and tap the **Moto** folder >  **Smart Connect**

Or swipe up from the home screen and tap  **Settings** > **Connected devices** > **Smart Connect**.

What you'll need

- » Windows 10 or 11 PC, Android 11 or later tablet, with the **Smart Connect** app installed.
- » Data cable with USB-C to plug into the phone and USB-C to plug into the PC or Android tablet.
- » Miracast-compatible displays and Chromecast devices.

Tip: When connecting with **Smart Connect**, you can also connect Bluetooth® compatible accessories, such as keyboard, mouse or gaming controller (sold separately).

Connect with PC

- 1 On your PC, download and install the **Smart Connect** app from <https://smartconnect.motorola.com>.
- 2 Start the **Smart Connect** app on your PC and click **Go to dashboard**.
- 3 Connect your phone and PC to the same Wi-Fi network. Then, on your phone, swipe up from the home screen and tap the **Moto** folder >  **Smart Connect**. Then tap  >  **Show QR code to scan from another device** > **Scan** to scan the QR code on the **Smart Connect** dashboard on your PC.

Or use a USB-C cable to connect your phone with the PC, then select **Smart Connect** from the pop-up window on your phone.
- 4 You can now choose an experience on the **Smart Connect** dashboard on your phone. For detailed instructions, tap  > your profile picture > **Help** > **Use mobile devices with PC**.

Connect with tablet

- 1 Download the **Smart Connect** app from Play Store to your Android 11 or later tablet.
- 2 Start the **Smart Connect** app on your tablet and click **Go to dashboard**.
- 3 Connect your phone and tablet to the same Wi-Fi network. Then, on your phone, swipe up from the home screen and tap the **Moto** folder >  **Smart Connect**. Then tap  >  **Show QR code to scan from another device** > **Scan** to scan the QR code on the **Smart Connect** dashboard on your tablet.

Or use a USB-C cable to connect your phone with the tablet, then select **Smart Connect** from the pop-up window on your phone.
- 4 You can now choose an experience on the **Smart Connect** dashboard on your phone. For detailed instructions, tap  > your profile picture > **Help** > **Use mobile devices with PC** > **Use phone on tablet or PC** > **Phone on Tab**.

Connect with monitor or TV

- 1 Open the  **Smart Connect** app on you phone and tap  > **Displays** to search for nearby Miracast-compatible displays and Chromecast devices.
 - **Miracast®**: Identify Miracast displays by looking for the Smart Connect icon  next to your device's name. When you connect Miracast devices wirelessly, you can launch the Experience Hub on your display. Miracast doesn't require a local Wi-Fi network. Check your display's model specifications to determine whether it is a Miracast device.
 - **Chromecast™**: You can identify Chromecast displays by looking for the Cast icon  next to your device name. Displays only supports display mirroring with Chromecast devices. Experience Hub is not supported on Chromecast devices.
- 2 Select the wireless display you want to connect with.
- 3 If connected with a Miracast-compatible display, choose an experience. If connected with a Chromecast device, your phone's screen is mirrored to the connected display. Apps compatible with Chromecast devices may have more functionality if you connect to a Chromecast device from the

app. For details about Smart Connect display experience, on your phone, tap menu ≡ > **Help > Use phone with TV > Get started**.

Or use an HDMI or USB-C cable to connect your phone with a TV or monitor. For detailed instructions, tap ← > your profile picture > **Help > Use phone with TV > Get started > Connect with cable**.

- 4 You can use your phone as trackpad or remote air mouse to control the connected monitor or TV. For detailed instructions, tap menu ≡ > **Help > Use phone with TV > Get started**.

Connect to your car

You can use **Android Auto** to connect your phone to your car's display and control maps, media, and messaging. Use voice commands using the Google Assistant. Just say "Hey Google."

Note: To turn this feature on, swipe up from the home screen and tap  **Settings > Google > All services > Search, Assistant & Voice > Google Assistant > Voice Match**.

Once connected via a USB to USB-C cable, or connected wirelessly, **Android Auto** starts automatically.

Tip: To set the voice languages, sign in to your Google Account, and swipe up from the home screen and tap  **Settings > Google > All services > Search, Assistant & Voice > Voice > Languages**.

Note: Confirm that your car and Android phone are compatible with **Android Auto**. Your phone might ask you to download the Android Auto app or update to the newest version of the app. To learn about more features, go to <http://android.com/auto>.

Pay with your phone

You can use a secure payment app, like  **Google Wallet**, to pay for your purchase (where available and supported).

To turn on NFC, swipe up from the home screen and tap  **Settings > Connected devices > Connection preferences > NFC**, then tap the switch to turn it on.

Look for the NFC logo on the payment device, to confirm that you can make a mobile payment. Touch the back of your phone to the payment device to pay for your purchase. You may need to authenticate your purchase using your fingerprint or passcode.

Share files with your computer

Note: Copyright—do you have the right? Always follow the rules. See "Content copyright" in the legal and safety information on your phone. Connect your phone to the internet, swipe up from the home screen and tap  **Settings > About phone > Legal information > Legal and safety**, then tap **Content copyright** under **Legal & safety**.

You can use a USB cable to move music, pictures, videos, documents, or other files between your computer and phone.

Note: If your phone gets exposed to water, ensure that the port is completely dry before connecting a USB cable. If water is detected on the USB connector, a warning notification appears in the Notification panel.

Tip: You can also [Connect with Smart Connect](#) or your Google Account to sync files.

For Microsoft® Windows®:

- 1 Unlock your phone.
 - 2 With a USB cable, connect your phone to your computer.
 - 3 On your phone, when the **Select USB mode** popup shows, tap **File Transfer** or **Photo & video transfer**.
Or swipe up from the home screen and tap  **Settings** > **Connected devices** > **USB** > **File transfer**.
 - 4 A file transfer window will open on your computer. Use it to drag files. If you don't see it, go to **This PC** and select your phone, then you can drag and drop files.
 - 5 When you're done, eject your phone from Windows and unplug the USB cable.
- Tip:** For more instructions or driver files, visit www.motorola.com/support.

For Apple™ Macintosh™:

Use Android File Transfer, available at www.android.com/filetransfer.

Virtual Private Network (VPN)

A VPN lets you access files on a secured network (like an office network with a firewall). Contact the network administrator for VPN settings, and any additional apps or requirements.

To enter VPN settings, swipe up from the home screen and tap  **Settings** > **Network & internet** > **VPN**. Tap  to add a new VPN. Choose the type of VPN and enter settings from the network administrator. Select the VPN name to connect.

Share your data connection by USB cable

Your computer can access the Internet through your phone's mobile network—you just need a USB cable.

Note: Your phone turns off Wi-Fi and uses the mobile network for Internet access. This feature may require an additional subscription service from your service provider.

- 1 Connect your phone to your computer using a USB cable.

Note: Mac computers can't tether with Android by USB.

- 2 On your phone, swipe down from the home screen and make sure **Wi-Fi** is off.
- 3 On your phone, swipe up from the home screen and tap  **Settings** > **Network & internet** > **Hotspot & tethering** > **USB tethering**.

To stop the connection, tap **USB tethering** again, then disconnect your phone from your computer.

Share files with Quick Share

Share files with nearby contacts using Quick Share.

Find it: Swipe up from the home screen and tap  **Settings** > **Connected devices** > **Connection preferences** > **Quick Share**

Note: Bluetooth and Location features must be turned on. Not all phones can receive files using Quick Share.

- 1 Tap **Who can share with you** and then turn on the switch next to **Visible to nearby devices** to choose an option:
 - **Your devices:** Your phone is visible to your devices with the same Google Account signed in.
 - **Contacts:** Your phone is visible to your nearby contacts while your screen is on and unlocked. You can choose to make your phone visible to all contacts or select specific contacts.
 - **Everyone:** Anyone near you can share with your phone when the screen is unlocked.
- 2 Open the file you want to share, such as a photo, video, or website.
- 3 Tap  >  **Quick Share**.
- 4 Tap the device to send the file.
- 5 Tap **Accept** on the receiving phone.

Print

Print your photos, documents, and more from your phone.

Swipe up from the home screen and tap  **Settings** > **Connected devices** > **Connection preferences** > **Printing**, then tap a print service. Tap **Add service** to add a print service that can provide data by Wi-Fi or mobile network.

To print from your phone, select the file and tap Menu  or More > **Print**.

Sync to the cloud

One account with access to everything, everywhere—phone, tablet, computer.

Auto-sync your Google account

To auto-sync your Google account, swipe up from the home screen and tap  **Settings** > **Passwords, passkeys & accounts**, then tap the switch next to **Automatically sync app data** to turn it on.

Manually sync your Google account

To manually sync your Google account, swipe up from the home screen and tap  **Settings** > **Passwords, passkeys & accounts**, choose your Google account, select **Account sync**, and tap the switch next to the services you want to sync. Then, tap Menu  > **Sync now**.

Note: If an app doesn't show in the account sync list, it can't auto-sync with your Google Account. To manually sync other Google apps, look in each app's settings menu for an option to sign in or sync. You can also use  **Google One** to [Backup & restore](#) all the apps, messages, and more.

Phone, & tablet & Bluetooth® accessories

Your Android phone, tablet and Bluetooth accessories can work together to help you get the most out of both:

- » **Transfer media and files:** Copy files to your phone and transfer them to other devices—see [Share files with your computer](#).
- » **Phone hotspot:** If you have a Wi-Fi tablet, turn your phone into a Wi-Fi hotspot to let your tablet access the Internet anywhere—see [Wi-Fi hotspot](#).
- » **Bluetooth accessories:** If you have a Bluetooth keyboard or other accessories to use with your tablet, remember you can use them with your phone too. To connect them, see [Connect through Bluetooth](#).

Cast to a TV

To cast (mirror) your screen on a TV, showing all apps and screens you use on your phone, you'll need to use a TV with Miracast® or Chromecast™ built-in, or plug a Chromecast device into your TV's HDMI port.

- 1** Make sure your phone and TV/Miracast device/Chromecast device are connected to the same Wi-Fi network.
- 2** On your phone, swipe up from the home screen and tap  **Settings** > **Connected devices** > **Connection preferences** > **Cast**.
- 3** Tap the name of the TV/Miracast device/Chromecast device to connect.

Note: To stop casting, on the casting notification, tap  > **Disconnect**.

Tip: You can mirror your phone on a TV or monitor using **Smart Connect**. For more, see [Connect with Smart Connect](#).

Use a microSD card

You can move pictures, videos, audio, and other media files from internal phone storage to a microSD card (sold separately).

Note: Your phone supports microSD cards up to **XXXGB/TB**. Use a Class 10 (or higher) microSD card for best results.

Format a microSD card

Insert the microSD card into your phone (see [Insert the SIM and microSD cards](#)).

Caution: Do not use your computer to format the microSD card.

- 1 On your phone, swipe up from the home screen and tap  **Settings** > **Storage**.
- 2 Tap **This device** and select the microSD card from the drop-down list.
- 3 Tap Menu  then select **Format**.

Caution: Formatting a microSD card will erase any files on the card.

Move files from your phone to a microSD card

You can move files from your phone to a microSD card. This frees up internal phone space.

- 1 Swipe up from the home screen and tap  **Settings** > **Storage** > **Free up space** > **Internal storage**.
- 2 Touch and hold a folder or a particular item, then tap Menu  > **Move to** > **SD card**.
- 3 Select a folder or location, then tap **Move here**.

Tip: To move a folder or an item to a new folder, tap Menu  > next to the folder or item > **Move to** > **Internal storage** > **Add new folder**, then enter the folder name and tap **Move to folder**.

Remove a microSD card

To unmount your microSD card (so you can take it out of your phone):

- 1 On your phone, swipe up from the home screen and tap  **Settings** > **Storage**.
- 2 Tap **This device** and select the microSD card from the drop-down list.
- 3 Tap Menu  then select **Eject**.

Caution: Do not remove a microSD card while your phone is using it or writing files to it.

Airplane mode

Use airplane mode to turn off all your wireless connections—useful when flying. Open [Quick Settings](#) and tap ✈️ **Airplane mode** or ✈️.

Note: When you select airplane mode, all wireless services are disabled. You can then turn Wi-Fi and/or Bluetooth back on, if permitted by your airline. Other wireless voice and data services (such as calls and text messages) remain off in airplane mode. Emergency calls to your region's emergency number can still be made.
