

Exhibit 2. Statements of Certification -- Pursuant to 47 CFR 2.907

2.1. Specification Compliance

Transceiver type described herein (IHDT56NG1) has been tested in accordance with the requirements contained in the appropriate Commission regulations. To the best of my knowledge, these tests were performed using measurement procedures consistent with industry or Commission standards, and demonstrate that this equipment complies with the appropriate standards. Each unit manufactured, imported, or marketed will conform to the samples tested herein, within the statistical variations that can be expected due to high volume production and test measurement error.

2.2. Statement of Certification

I hereby certify that the above application was prepared under my direction and that to the best of my knowledge and belief, the facts set forth in this application and accompanying technical data are true and correct.

The technical data supplied with this application was taken under my supervision and is hereby duly certified. I also certify that this transmit equipment (IHDT56NG1) is in compliance with all applicable parts of the FCC Rules.

TITLE: Engineering Manager, Product Safety and Compliance

2.3. Attestation Statement (Equipment Class DTS and DSS - Bluetooth/Wi-Fi)

This device contains an embedded Bluetooth device, Wi-Fi device, and MOTOtalk capabilities that Motorola Mobility confirms are compliant with the applicable Part 15C regulations. Personal Hotspot operation is only supported in the 2.4 GHz band.

15.247(a)(1)

- The hopping sequence must be pseudorandom.
- All Channels are used equally on average.
- The receiver input bandwidth is approximately equal to the transmit bandwidth.
- The receiver hops in sequence with the transmitted signal.

15.247(d)

In order to ensure compliance with band edge emissions requirements at the upper end of the authorized spectrum, the conducted RF power of this device is reduced when operating on Channels 1 and 11, in the 802.11 b/g/n modes.

15.247(g)

The system is designed to comply with all of the regulations in Section 15.247 when the transmitter is presented with a continuous data (or information).

15.247(h)

The system does not coordinate its channel selection/hopping sequence with other frequency hopping systems for the express purpose of avoiding the simultaneous occupancy of individual hopping frequencies by multiple transmitters.

2.4. Attestation Statement (Equipment Class NII - U-NII Wi-Fi)

This device contains an embedded U-NII Wi-Fi device that Motorola Mobility confirms to be compliant with the applicable Part 15E regulations. Note that Personal Hotspot operation is supported in this band, but only in the 5.725–5.825 GHz portion.

15.407(c)

The device will automatically discontinue transmission in case of either the absence of information to transmit or operational failure.

15.407(h)(1)

This device operates in the bands between 5.25 – 5.35 GHz and 5.47 – 5.725 GHz, but the device's EIRP is less than 500 mW, and as such Transmit Power Control (TPC) is not required.

15.407(h)(2)

This device does operate in the bands between 5.25 – 5.35 GHz and 5.47 – 5.725 GHz, and as such implements Dynamic Frequency Selection (DFS) as a client device. This device cannot initiate transmissions nor does it support ad-hoc networking in this band.

2.5. Attestation Statement (Equipment Class PCE – CDMA 850/1900 MHz - Hearing Aid Compatibility)

Motorola Mobility hereby declares that typical production units were evaluated for Hearing Aid Compatibility (HAC) compliance.

Features List: Model – XT926

CDMA	CDMA 1X / EV-DO Rev. A	LTE
Wi-Fi (a/b/g)	Bluetooth (Stereo)	Location-Based Services
Voice Commands	Talking Phone	Photo Camera
Video Camera	Video Player	Hands Free Speaker Phone
Music Player	HTML Browser	Text Messaging

2.6. Declaration of Available Operating Bands and Modes (Equipment Class PCE – CDMA 850/1900 MHz and Band 13 LTE)

Motorola Mobility hereby declares that, while this product features GSM and WCDMA capabilities that operate within frequency bands regulated by the FCC, these modes are locked out for use within the territories of the United States. These modes have been disabled in the product's firmware, and are SIM locked by all US operators. This application, therefore, does not seek certification for these modes.
