Photograph 9-2: Back side view of the device's PC Board.

A detailed photograph of a disassembled smartphone, showing the internal components. The main green printed circuit board (PCB) is visible, populated with numerous integrated circuits, capacitors, and other electronic components. A large black rectangular component, likely the battery, is positioned in the upper right. A silver-colored metal shield covers the camera lens and flash assembly. A gold-colored SIM card is inserted into its slot on the right side. A large, irregularly shaped gold-colored metal shield is located in the lower right corner. The bottom edge of the PCB features a black plastic component, possibly a speaker or microphone. The entire assembly is set against a plain white background.

Photograph 9-3: Front side view of the device's PC Board, Shields Removed.
