Photograph 9-6: Rear Housing

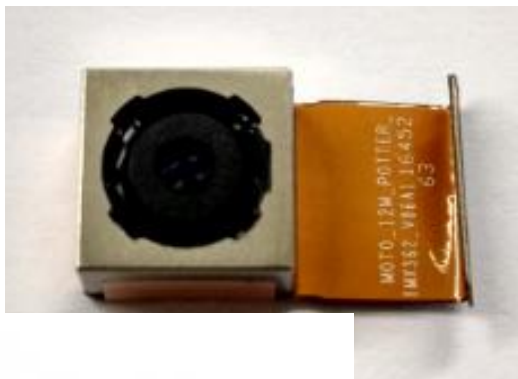

A detailed view of the internal components of a smartphone chassis. The large, light-colored battery is the central feature, with a circular cutout in the center containing the text "33014031002" and "12/18/16/F2". To the left of the battery is the SIM card slot, which is currently empty. Above the battery, there is a yellow component, likely a camera or sensor. The right side of the chassis shows the green printed circuit board (PCB) with various electronic components, including a large black rectangular component, possibly a display or sensor. The bottom of the chassis features a charging port and a speaker grille. The entire assembly is housed within a gold-colored metal frame.
